## **Abstracts**

UAE CT scanners market is anticipated to register growth with an impressive CAGR in the forecast period, 2023-2027, on the account of increasing applications of radio imaging for diagnostic medicines. Increasing demands for tomographical imaging through multi-angled x-ray images to diagnose chronic diseases and conditions in patients further drive the growth of the UAE CT scanners market in the upcoming five years. Increasing instances of chronic diseases and increasing demand for the early diagnosis of the diseases to provide efficient treatments further leads to the growth of the UAE CT scanners market in the future five years.

### **Growing Disease Burden Drives Market Growth**

Increasing instances of chronic diseases and demand for detailed as well as early diagnosis of the diseases are anticipated to majorly drive the growth of the UAE CT scanners market in the upcoming five years. Cardiovascular diseases cause 40% of deaths annually among the population of UAE. Increasing instances of diseases like abdominal obesity (71.5%), dyslipidemia (74.0%), hypertension (43.0%), and diabetes (32.4%) in the young adult population of the country add to the growing death rate due to cardiovascular diseases.

Moreover, instances of cancer among the population are also majorly responsible for the increasing demand for CT scanners in recent years. In the year 2020, over 4000 new cancer cases were recorded among the population of UAE. Breast cancer (1030 cases), colorectum cancer (510 cases), Thyroid cancer (405 cases), Leukemia (272 cases), and Prostate cancer (270 cases), while 2,320 cases were for all other types of cancers.

### Expanding Healthcare Sector Drives Market Growth

Increasing investments in the healthcare sector from various resources like government, foreign direct investments, and private investments along with the governmental schemes lead to the growth of the expansion of the healthcare industry in the country. Investments toward advancing the healthcare infrastructure and thus growing numbers of hospitals, diagnostic labs, clinics, etc. aid the growth of the UAE CT scanners market in the next five years. As of 2017, there were 45 hospitals, 8,322 physicians, and 20,480 nurses in the government sector, and 98 hospitals, 14,785 physicians, and 33,435 nurses in the private sector. By the year 2020, there were 104 hospitals, throughout the seven Emirates, and 19.3 physicians and 40.9 Nurses and Midwives per 10,000 persons in the U.A.E. Recent pandemic situation further aided the concerns for public healthcare and several hospitals and medical centers are bound to increase thus indirectly supporting the growth of the UAE CT scanners market in the future five years.

### Market Segmentation

The UAE CT scanner market is segmented by the slice, modality, device architecture, application, end user, competition landscape, and regional distribution. Based on slice, the market is further segmented into 8-slice, 16-slice, 32-slice, 64-slice, and 128-slice & above. By modality, the market is differentiated between fixed and mobile. Based on device architecture, the market is distinguished between o-arm and c-arm. By application, the market is fragmented into cardiology, oncology, neurology, and others. Based on end users, the market is bifurcated into hospitals, diagnostic centers, and others. The market analysis also studies the regional segmentation to devise regional market segmentation, divided among Abu Dhabi, Dubai, Sharjah, and the rest of UAE.
