Abstracts

Enterprise Resource Planning (ERP) is a backend software, which stores data collected from various departments in an organization at a centralized location, thereby providing access of data collected from various departments to all the stakeholders, in order to assist them in decision-making. UAE ERP market grew at a significant pace over the past few years, owing to rising government initiatives, such as Smart Dubai, UAE Vision 2021 and Abu Dhabi Economic Vision 2030. ERP market in the country is also expected to witness an uptrend on account of increasing number of companies focusing towards reducing operational costs by implementing new business trends, such as bring your own device (BYOD) and cloud computing. Moreover, rising digitalization of UAE's educational sector is also anticipated to propel demand for ERP solutions in the country through 2022.

According to "UAE ERP Market By Deployment Type, By Function, By End User, By Enterprise, Competition Forecast & Opportunities, 2012 - 2022", ERP market in the UAE is projected to exhibit a CAGR of over 13% during 2017 - 2022. On-premise deployment dominated UAE ERP market during 2012-2016, followed by cloud deployment. Though on-premise deployment is expected to maintain majority market share, cloud deployment is forecast to witness faster growth in the coming years. Northern region of the country has been the leading consumer of ERP solutions over the last few years, and this trend is anticipated to continue during the forecast period as well. SAP is the largest ERP solution provider in the UAE, followed by Oracle, Sage, Infor and Microsoft. "UAE ERP Market By Deployment Type, By Function, By End User,
