Abstracts

UAE Iso Propyl Alcohol (IPA) Market stood at 28.84 Thousand Tonnes in 2020 and is forecast to reach 39.32 Thousand Tonnes by 2030, growing at a healthy CAGR of 2.96% until 2030. UAE isopropyl alcohol market is expected to register the anticipated growth on the backbone of its advantages in the various end-use industries and its functions in flux residue removal as a general cleansing agent against grease and oil. IPA is a versatile solvent used across industries such as chemicals, paints and coatings, pharmaceuticals, cosmetics, etc. The solvents sector holds the largest market share of the country's total IPA consumption and is expected to witness remarkable growth in the forecast period. Because it is highly evaporative and extremely safe, there has been reportedly growing demand for IPA for sterilization applications in the healthcare and pharmaceuticals sector in UAE.

Due to the outbreak of COVID-19 in 2020, the world economy was disrupted. The market was affected drastically, and production and manufacturing units were shut down. Furthermore, the major market players intentionally halted the production keeping their employee's health and wellness in mind. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. The pandemic is slowly being subsided and the effects are tried to be overcome by various methods. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period.
