Abstracts

The UAE LPG market demand stood at 1.5 Million Tonnes in 2020 and is forecast to reach 2.7 Million Tonnes by 2030, growing at a healthy CAGR of 5.96% until 2030. LPG is primarily used as a cooking fuel in the UAE. It is also used as a fuel in various commercial and industrial applications. The increase in the support provided by the leading authorities in form of subsidies to promote the use of LPG is expected to boost the market growth. Since the onset of COVID-19, the demand for LPG declined as the major end-user industries were shut down to contain the spread of novel coronavirus. Disruption in the supply chain along with other lockdown restrictions further led to hinder the LPG market growth.

Under this subscription, you would be able to access UAE LPG market demand and supply analysis on a cloud-based platform for one year. The data is updated on a near real-time basis to add any new movement in the industry including but not limited to new plant announcements, plant shutdowns, temporary disruptions in demand or supply, news and deals, and much more specific to LPG.

Years Considered for Analysis:

Historical Years: 2015 – 2018

Base Year: 2019

Estimated Year: 2020

Forecast Period: 2021 – 2030

This report will be delivered on an online digital platform with a one-year subscription and quarterly update.

Deliverables

Installed Capacity By Company: Installed capacity within the country along with the individual capacity of leading players

Installed Capacity By Location: Installed capacity at several locations across the country

Production By Company: Actual production done by different companies

Operating Efficiency By Company: Operating efficiency at which different companies are operating their plants

Demand By End Use: Demand/Sale of LPG in different end user industries across the country
