Abstracts

UAE syringe market is anticipated to register growth with an impressive CAGR in the forecast period, 2023-2027, on the account of increasing demands for injectable pharmaceuticals. Increasing demand for quick administration and immediate affecting drugs in the system is further driving the growth of the UAE syringe market in the upcoming five years. The rising geriatric population and their susceptibility toward diabetes and other chronic diseases also aid in the growth of the UAE syringe market in the next five years.

COVID-19 Upsurged Market Growth

Demands for syringes boomed suddenly with the vaccination availability all around the world. The COVID-19 infection was widespread and affected the United Arab Emirates too. Over 884 thousand people have by far accounted to be infected by the coronavirus while there were 2302 deaths between 2020-2021 due to COVID-19. The government soon started with the vaccination that aided the growing demand for syringes. By far, 24.2 million doses have already been given the vaccination which accounts for approximately 96.3% of the population is fully vaccinated. Although the cases of

COVID-19 infection are still increasing the death toll has reduced since the vaccination, and the population has higher immunity and can recover.

Cancer Therapeutics Promises Market Growth

Therapeutic procedures like chemotherapy, for the treatment of cancer, have increased the demand for syringes. Increasing instances of cancer among the population of the country further aid the growth of the UAE syringe market in the upcoming five years. 4,807 new cancer cases were accounted for in the year 2020 including both male and female populations. With early detection of cancer, exposure to chemotherapy for a short duration of time makes the treatment efficient and effective. Rapidly growing preferences of the population toward chemotherapy over radiotherapy further aid the growth of the UAE syringe market in the next five years.

Insulin Pump Demands Upsurge Market Growth

Increasing instances of diabetes among the population of the country is further aiding the growth of the UAE syringe market in the upcoming five years. As of 2021, more than 1 million population is suffering from diabetes in the country. In every 6 babies born in the country, one has diabetes due to genetic mutations or due to their parents carrying the genes, thus affecting the population at large. The increasing demand for insulin injectables further substantiates the growth of the UAE syringe market in the next five years.
