## **Abstracts**

United Kingdom Data Center market is growing owing to increasing adoption of data center in banking, financial services, and information technology and telecom along with rising government investment to provide the physical data center space. The increasing risks of hacking and cybersecurity concerns across various end-use industries have led to an increased focus on data center to overcome the situation and secure the data. Moreover, 5G infrastructure investments in edge data centers have further boosted the demand for data center. The widespread adoption of 5G services and the growth of smart cities in the United Kingdom will increase the country's capacity for data centres while also boosting data traffic and driving demand for new data centers. Many enterprises are adopting data center as a cost-effective solution. Moreover, the market is anticipated to be driven by rising demand for digital age networking, which enables businesses to progress toward digital transformation and produce new business outcomes by utilizing new digital age technologies such as the Internet of Things (IoT), cloud computing, and Artificial Intelligence (AI) and thus relying on different software are driving the market. Additionally, the rise in business use of high-end cloud computing in developing regions promotes the development of the data center market of United Kingdom throughout the forecast period.

A data center is a location that centralizes an organization's IT operations and hardware for the purposes of storing, processing, and distributing data and applications. It offers reliable storage without the glitches of portable technology, eliminating a portion of losses, reduce costs, manage data, and protect upcoming technology investments. Data centers are a crucial component of every organization, since they are created to support corporate applications and offer services such as productivity applications, high-volume e-commerce transactions, data storage, management, backup, and recovery. Many businesses opt to establish their own on-site data centers since many believe there can be better control information security and adhere to laws such as the European Union General Data Protection Regulation (GDPR). Edge data centers can assist reduce latency for real-time, data-intensive workloads including big data analytics, Artificial Intelligence (AI), and content delivery apps, enhancing overall application performance and user experience. For enterprises that lack the space, personnel, or experience to deploy and operate all or part of their IT infrastructure on-site, managed data centers and colocation facilities are choices.

### The Increased Investment in The Country

The increasing investment in the United Kingdom by the government and the private entities are further propelling the high adoption rate for data center and related infrastructure in the recent years. In addition, despite the Brexit uncertainty, several factors make digital transformation and technology investment in the United Kingdom promising. Cities such as Manchester are one of the media and technological industry hubs in Europe that is expanding the quickest, whereas London has long been the world's financial hub, therefore the data centers prominent vendors are continuously investing on setting up new data centers in the regions. Companies such as Equinix, Inc. are investing around USD 181.017 million by expanding its two international business exchange sites by opening new data centers facilities. Due to expanded infrastructure and more complicated networking, server, storage, and other equipment, data centers are becoming more and more expensive, necessitating effective data center solutions and services. Although, the United Kingdom market has the most developed data center infrastructures. The requirement for the data centers has exceeded with the rapid expansion of technologies in the country. For instance, according to the Digital Connectivity Forum (DCF), a leading advisory group to United Kingdom Government on connectivity had estimated the requirement of around USD 28.85 billion investment in the 5G infrastructure by 2030. This in turn is advancing the country along with upfront of prominent service providers to invest more on such data storage facilities and attracting the third-party investments. Thus, growing investment in

the country has anticipated the demand of data center in the United Kingdom market.

### 5G Will Increase Investments in Edge Data Centers

Edge computing is becoming more popular in the market just like 5G has been massively ramped up in the last couple of years, as a result of the rising use of connected devices among consumers and organizations. In many Tier II and Tier III cities as well as in rural areas, this has resulted in a significant demand for higher-bandwidth internet, necessitating the construction of data centers to process information on comparison with big cities. Edge data centers will develop a decentralized data center architecture in which numerous edge data centers are linked to a single hyperscale facility. Over 54% of United Kingdom cities have 5G coverage as of May 2022, with significant market participants including EE Mobile, Three Mobile, and O2 Mobile. In 370 towns, United Kingdom telecommunications are offering 5G connection. EE mobile is second, while Vodafone is third. Government associations such as Department for Digital, Culture, Media & Sport in United Kingdom including top universities such as University of York, University of Bristol and University of Surrey has teamed up for the deployment of next generation 5G and 6G wireless technology and telecoms security. Throughout United Kingdom, these institutions will team up with large enterprises such as Nokia, Ericsson, and Samsung to design and build networks of the future such as 6G. Moreover, these companies have partnered to develop innovative 5G use cases and will bolster the United Kingdom's status as a global leader in telecoms research. Furthermore, the companies are extending their 5G coverage to new locations across the region which necessitates the construction of the physical infrastructure to facilitate the significant degree of data sharing. Hence, increasing 5G investment are attributing the growth of United Kingdom Data Center market.

### Growing Use of Renewable Energy

Many data center service providers have invested in clean, renewable energy sources to run their existing and future facilities as a result of the rising data center power usage and the desire to reduce carbon footprint. The two main energy sources in the United Kingdom are oil and natural gas, both of which have a negative influence on the environment. On the contrary, 38.2% of the energy generation is done through renewable sources such as wind power, solar power, hydropower, and biomass energy. In addition, 20GW of electricity was produced by wind contributing to 70% of electricity generation in November 2022. Moreover, Domestic Renewable Heat Incentive (DRHI) and Green Gas Support Scheme and Green Gas Levy both call for the National Renewable Action Plans (NREAPs) to be implemented in order to fully use the country's

potential for renewable energy. Recently, United Kingdom has received an investment of more than USD 38.38 million to produce renewable energy by developing cutting-edge innovative new energy storage technologies such as thermal batteries and liquid flow batteries. Furthermore, government initiative toward proliferating the large-scale projects to adopt and support renewable energy such as the Renewable Obligation (RO) initiative was set by the Department for Business, Energy, and Industrial Strategy (BEIS). Therefore, growing use of renewable energy has led to the growth of data center in the United Kingdom market.

## Market Segmentation

United Kingdom Data Center Market is divided into solution, type, end-user, and region. Based on solution, the market is further divided into IT infrastructure, general infrastructure, electrical infrastructure, mechanical infrastructure, and others. Based on type, the market is further split into corporate and web hosting. Based on end user Industry, the market is further divided into information technology & telecom, government, BFSI, healthcare and others.

## Market Player

Major market players in the United Kingdom Data Center market are Ark Data Centers Limited, China Mobile International (UK) Limited, Digital Realty Trust, Inc., CyrusOne UK Limited, Vantage Data Centers (UK) Limited, NTT Global Data Centers EMEA UK Ltd., Interxion Holding NV, ST Telemedia Global Data Centres (VIRTUS Data Centres), Echelon Data Center, and Equinix (UK) Limited.

## Report Scope:

In this report, the United Kingdom Data Center market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

### United Kingdom Data Center Market, By Solution:

IT Infrastructure

General Infrastructure

Electrical Infrastructure

Mechanical Infrastructure

Others

United Kingdom Data Center Market, By Type:

Corporate

Web Hosting

United Kingdom Data Center Market, By End-User:

Information Technology & Telecom

Government

BFSI

Healthcare

Others

United Kingdom Data Center Market, By Region:

Scotland

Southeast

London

Southwest

East Anglia

Yorkshire & Humberside

East Midlands

## Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in the United Kingdom Data Center market.

## Available Customizations:

With the given market data, Tech Sci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

## Company Information

Detailed analysis and profiling of additional market players (up to five).

## Contents

### 1. Product Overview

#### 1.1. Market Definition

#### 1.2. Scope of the Market

##### 1.2.1. Markets Covered

##### 1.2.2. Years Considered for Study

##### 1.2.3. Key Market Segmentations

### 2. RESEARCH METHODOLOGY

### 3. EXECUTIVE SUMMARY

### 4. IMPACT OF COVID-19 ON UNITED KINGDOM DATA CENTER MARKET

### 5. VOICE OF CUSTOMERS

### 6. UNITED KINGDOM DATA CENTER MARKET OUTLOOK

#### 6.1. Market Size & Forecast

##### 6.1.1. By Value

#### 6.2. Market Share & Forecast

##### 6.2.1. By Solution (IT Infrastructure, General Infrastructure, Electrical Infrastructure, Mechanical Infrastructure and Others)

##### 6.2.2. By Type (Corporate and Web Hosting)

##### 6.2.3. By End-User (Information Technology & Telecom, Government, BFSI, Healthcare and Others)

##### 6.2.4. By Region (Scotland, Southeast, London, Southwest, East Anglia, Yorkshire & Humberside, East Midlands)

#### 6.3. By Company

#### 6.4. Market Map

### 7. UNITED KINGDOM IT INFRASTRUCTURE MARKET OUTLOOK

#### 7.1. Market Size & Forecast

- 7.1.1. By Value
- 7.2. Market Share & Forecast
  - 7.2.1. By Type
  - 7.2.2. By End-User
  - 7.2.3. By Region

## **8. UNITED KINGDOM GENERAL INFRASTRUCTURE MARKET OUTLOOK**

- 8.1. Market Size & Forecast
  - 8.1.1. By Value
- 8.2. Market Share & Forecast
  - 8.2.1. By Type
  - 8.2.2. By End-User
  - 8.2.3. By Region

## **9. UNITED KINGDOM ELECTRICAL INFRASTRUCTURE MARKET OUTLOOK**

- 9.1. Market Size & Forecast
  - 9.1.1. By Value
- 9.2. Market Share & Forecast
  - 9.2.1. By Type
  - 9.2.2. By End-User
  - 9.2.3. By Region

## **10. UNITED KINGDOM MECHANICAL INFRASTRUCTURE MARKET OUTLOOK**

- 10.1. Market Size & Forecast
  - 10.1.1. By Value
- 10.2. Market Share & Forecast
  - 10.2.1. By Type
  - 10.2.2. By End-User
  - 10.2.3. By Region

## **11. MARKET DYNAMICS**

- 11.1. Drivers
- 11.2. Challenges

## **12. MARKET TRENDS & DEVELOPMENTS**

## **13. POLICY & REGULATORY FRAMEWORK**

## **14. UNITED KINGDOM ECONOMIC PROFILE**

## **15. COMPANY PROFILES**

### 15.1. Ark Data Centres Limited

15.1.1. Business Overview

15.1.2. Key Revenue and Financials (If Available)

15.1.3. Recent Developments

15.1.4. Key Personnel

15.1.5. Key Product/Services

### 15.2. China Mobile International (UK) Limited

15.2.1. Business Overview

15.2.2. Key Revenue and Financials (If Available)

15.2.3. Recent Developments

15.2.4. Key Personnel

15.2.5. Key Product/Services

### 15.3. Digital Realty Trust, Inc.

15.3.1. Business Overview

15.3.2. Key Revenue and Financials (If Available)

15.3.3. Recent Developments

15.3.4. Key Personnel

15.3.5. Key Product/Services

### 15.4. CyrusOne UK Limited

15.4.1. Business Overview

15.4.2. Key Revenue and Financials (If Available)

15.4.3. Recent Developments

15.4.4. Key Personnel

15.4.5. Key Product/Services

### 15.5. Vantage Data Centers (UK) Limited

15.5.1. Business Overview

15.5.2. Key Revenue and Financials (If Available)

15.5.3. Recent Developments

15.5.4. Key Personnel

- 15.5.5. Key Product/Services
- 15.6. NTT Global Data Centers EMEA UK Ltd.
  - 15.6.1. Business Overview
  - 15.6.2. Key Revenue and Financials (If Available)
  - 15.6.3. Recent Developments
  - 15.6.4. Key Personnel
  - 15.6.5. Key Product/Services
- 15.7. Interxion Holding NV
  - 15.7.1. Business Overview
  - 15.7.2. Key Revenue and Financials (If Available)
  - 15.7.3. Recent Developments
  - 15.7.4. Key Personnel
  - 15.7.5. Key Product/Services
- 15.8. ST Telemedia Global Data Centres (VIRTUS Data Centres)
  - 15.8.1. Business Overview
  - 15.8.2. Key Revenue and Financials (If Available)
  - 15.8.3. Recent Developments
  - 15.8.4. Key Personnel
  - 15.8.5. Key Product/Services
- 15.9. Echelon Data Center
  - 15.9.1. Business Overview
  - 15.9.2. Key Revenue and Financials (If Available)
  - 15.9.3. Recent Developments
  - 15.9.4. Key Personnel
  - 15.9.5. Key Product/Services
- 15.10. Equinix (UK) Limited
  - 15.10.1. Business Overview
  - 15.10.2. Key Revenue and Financials (If Available)
  - 15.10.3. Recent Developments
  - 15.10.4. Key Personnel
  - 15.10.5. Key Product/Services

## **16. STRATEGIC RECOMMENDATIONS**

## **17. ABOUT US & DISCLAIMER**

(Note: The companies list can be customized based on the client requirements.)

## I would like to order

Product name: United Kingdom Data Center Market By Solution (Software, Services (IT Infrastructure, General Infrastructure, Electrical Infrastructure, Mechanical Infrastructure and Others), By Type (Corporate and Web Hosting), By End-User (Information Technology & Telecom, Government, BFSI, Healthcare and Others), By Region, Competition Forecast & Opportunities, 2028F

Product link: <https://marketpublishers.com/r/U2A98FBCB624EN.html>

Price: US\$ 3,500.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
