## **Abstracts**

United Kingdom LPG industry stood at 1.59 Million Tonnes in FY2021 and is forecast to reach 5.75 Million Tonnes by FY2030, growing at a healthy CAGR of 13.60% until FY2030 owing to its increased adoption of cleaner fuels across versatile industries. LPG is a versatile fuel serving a diverse group of industries, possessing low carbon characteristics thereby, one of the most appropriate alternatives to conventional fossil fuels. Because of its ease of transport and abundance in the European region, the country is keenly considering the use of LPG across several end-use industries and strengthening its LPG distribution networks. Due to the outbreak of COVID-19 the economy faced a downfall. The demand for LPG in commercial use declined while the demand for LPG in residential spaces witnessed a boost. Due to the increase in demand for LPG across various end-user industries the market is expected to witness growth in the forecast period.

Under this subscription, you would be able to access United Kingdom LPG market demand and supply analysis on a cloud-based platform for one year. The data is updated on a near real-time basis to add any new movement in the industry including but not limited to new plant announcements, plant shutdowns, temporary disruptions in demand or supply, news and deals, and much more specific to LPG.

Years Considered for Analysis:

Historical Years: FY2015 – FY2019

Base Year: FY2020

Estimated Year: FY2021

Forecast Period: FY2022 – FY2030

This report will be delivered on an online digital platform with a one-year subscription and quarterly update.

### Deliverables

**Installed Capacity By Company:** Installed capacity within the country along with the individual capacity of leading players
