Abstracts

United States active pharmaceutical ingredient market stood at USD17.81 billion in 2020 and is projected to grow at a CAGR of 9.73% to cross USD31.48 billion by 2026. This can be attributed to growing prevalence of chronic diseases such as cardiovascular diseases, diabetes, cancer, respiratory disorders, among others. This has drastically increased the patient pool thereby increasing the demand for drugs. This in turn is expected to positively influence the market growth through 2026. Additionally, increasing R&D by various biopharmaceutical companies in drug discovery is further expected to spur the market growth over the next few years. Besides this, growing importance of generics is also expected to foster the market growth in the next five years.

United States active pharmaceutical ingredient market can be segregated based on method of synthesis, source, distribution channel, therapeutic application, form, molecule type, potency, drug type, region and company. Based on method of synthesis, the market can be split into synthetic and biological. The synthetic method of synthesis dominated the market with a share of 58.29% in 2020 on account of the easy availability of raw materials and easier process for development of active pharmaceutical ingredients. While the biological method of synthesis segment is expected to grow at a rate of 10.82% during the forecast period owing to the growing demand for vaccines, monoclonal antibodies, recombinant proteins, biosimilars, among others.

Leading players operating in the market include Teva Pharmaceutical Industries Limited, Merck & Co., Inc., Pfizer Inc., Dr. Reddy's Laboratories Limited, Lupin Pharmaceuticals, Inc., Glenmark Pharmaceuticals, Inc., GlaxoSmithKline Plc, Novartis Inc. (Sandoz), Aurobindo Pharma USA, Inc., Sun Pharmaceutical Industries Ltd., Eli Lilly and Company, AbbVie Inc., Bristol-Myers Squibb, F. Hoffmann-La Roche Ltd., Sanofi-Aventis U.S. LLC and others. Major companies are developing advanced technologies and launching new products to stay competitive in the market. Other competitive strategies include mergers & acquisitions and new product developments. For instance, in 2020, Pfizer (US) signed a multiyear agreement with Gilead Sciences Inc., to manufacture and supply Gilead's antiviral drug (Remdesivir) for the treatment of COVID-19.

Years Considered for this Report:

Historical Years: 2016 – 2019

Base Year: 2020

Estimated Year: 2021

Forecast Period: 2022– 2026

Objective of the Study:

The primary objective of the study was to evaluate and forecast active pharmaceutical ingredient market in United States from 2021-2026.

To categorize the market on the basis of method of synthesis, source, distribution channel, therapeutic application, form, molecule type, potency, drug type, region and company.

To identify major drivers, challenges and trends in the United States active pharmaceutical ingredient market.

To identify the dominant region or segment in the United States active pharmaceutical ingredient market.

To examine competitive developments such as expansions, new product launches, mergers and acquisitions, etc., in the United States active pharmaceutical ingredient market.

To identify and analyze the profiles of leading players operating in the United States active pharmaceutical ingredient.

To identify key sustainable strategies adopted by market players in the United States active pharmaceutical ingredient market.

To extract the data for United States active pharmaceutical ingredient market, primary research surveys were conducted with API manufacturer and contract manufacturer companies. While interviewing, the respondents were also enquired about their competitors. Through this technique, TechSci Research was able to include manufacturers that could not be identified due to the limitations of secondary research. Moreover, TechSci Research analyzed various end user segments and projected a positive outlook for United States active pharmaceutical ingredient market over the coming years.

TechSci Research calculated the market size of United States active pharmaceutical ingredient market using a bottom-up approach, wherein data for various end-user segments was recorded and forecast for the future years. TechSci Research sourced these values from the industry experts and company representatives and externally validated them by analyzing historical data of these product types and applications for getting an appropriate, overall market size. Various secondary sources such as company websites, news articles, press releases, company annual reports, investor presentations and financial reports were also studied by TechSci Research.

Key Target Audience:

Active pharmaceutical ingredient manufacturers, contract manufacturers and other stakeholders

Market research and consulting firms

Government bodies such as regulating authorities and policy makers

Organizations, forums and alliances related to active pharmaceutical ingredient

The study is useful in providing answers to several critical questions that are important for industry stakeholders, such as active pharmaceutical ingredient manufacturers, customers and policymakers. The report also provides useful insights about which market segments should be targeted over the coming years to strategize investments and capitalize on growth opportunities.

Report Scope:

In this report, United States active pharmaceutical ingredient market has been segmented into following categories, in addition to the industry trends which have also been detailed below:

Market, By Method of Synthesis:

Synthetic

Biological

Market, By Source:

Contract Manufacturing Organizations

In-house manufacturing

Market, By Distribution Channel:

Offline

Online

Market, By Therapeutic Application:

Cardiovascular Disease

Anti-diabetic

Oncology

Neurological Disorders

Musculoskeletal

Others

Market, By Form:

Tablets

Capsule

Injection

Others

Market, By Molecule Type:
