Abstracts

The United States hydrogen peroxide market is valued at 630.87 thousand tonnes in 2020 and is forecast to reach 1013.76 thousand tonnes by 2030, growing at a healthy CAGR of 4.85% until 2030. US Hydrogen Peroxide market is strongly driven by growth in its Pulp and paper industry which holds the largest market share in the country's overall Hydrogen Peroxide consumption. Growing paper demand from personal hygiene products such as tissues, sanitary napkins, and the packaging sector would augment the growth of the country's Hydrogen Peroxide market. Moreover, due to its skyrocketing demand as a preferred oxidant for wastewater treatment, the market is likely to grow tremendously in the forecast period. The outbreak of COVID-19 in 2020 disrupted the world economy. The market growth was affected drastically, and production units shut down. Furthermore, the major market players intentionally halted the production keeping their employees' health and wellness in mind. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period. Potential investment in the market is expecting steady growth in the market in the forecast period, until 2030. United States is one the largest economies that were affected drastically due to COVID-19, and with well-established healthcare industry and sudden surge in the demand for hydrogen peroxide, the market is further expected to grow further in the forecast period.
