Abstracts

Trends in the fibre sector are an important indicator of future trends in textiles and apparel as a whole. This report provides an overview of general trends in fibre prices, production and consumption by country and region. It also provides insight, information, data and analysis of the key fibre types -- natural and man-made. Furthermore, it provides forecasts of cotton demand, supply and prices for the forthcoming year. World man-made fibre production rose in 2013 but the growth rate was lower than the hike achieved in the previous year. Not surprisingly, the 2013 rise was sustained by growth in China -- the world's largest producer. The increase was due mainly to a rise in demand for synthetic fibres. Production of natural fibres, meanwhile, fell following a decline in the previous year. The fall resulted from a decline in cotton production.

Contents

SUMMARY

GENERAL TRENDS

COTTON

World cotton prices, production and consumption

Trends in cotton prices

Cotton supply and demand in the 2013/14 season

Cotton stock levels in the 2013/14 season

Cotton price trends in the 2013/14 season

Cotton supply and demand in the 2014/15 season

Cotton stock levels in the 2014/15 season

Cotton price trends in the 2014/15 season

Regional patterns of cotton supply and demand

Regional patterns of cotton supply in the 2013/14 season

Regional patterns of cotton supply in the 2014/15 season

Regional patterns of cotton demand in the 2013/14 season

Regional patterns of cotton demand in the 2014/15 season

MAN-MADE FIBRES

Trends in man-made fibre production by fibre type

Trends in man-made fibre production by country and region

China

South Korea and Taiwan

Asean

South Asia

Industrialised countries
