Abstracts

This report includes statistical data and analysis of the global market for carbon fibre and carbon fibre composites. In particular, the report contains a wealth of recently released data relating to: global demand for carbon fibre; carbon fibre production capacity; and global demand for carbon fibre composites by type, region and application. Demand for carbon fibre and for carbon fibre composites is forecast to rise at substantial rates over the coming years—reflecting the fact that these materials represent key components for future high-tech applications. In response to such forecasts, many of the leading manufacturers of carbon fibre are pursuing substantial expansion strategies. At the same time, a number of smaller firms plan to increase their capacities, and many producers of carbon fibres are working to diversify their product portfolios.
