Abstracts

This report includes statistical data and analysis of glass fibre reinforced plastics production in Europe, and provides breakdowns in terms of segment and country or region. It also provides an outlook for the future. European production of glass fibre reinforced plastics is estimated to have remained stable in 2019 following six consecutive years of growth. As a result, it remained at its second highest level on record. Geographically, the largest producer was Germany, followed by Eastern Europe, Spain and Portugal, Italy, the UK and Ireland, and France. The largest segment was that of sheet moulding compound (SMC) components and bulk moulding compound (BMC) components, followed by: products manufactured using open mould processes; glass mat reinforced thermoplastics (GMT) and long fibre reinforced thermoplastics (LFT); sheet components and pultruded components manufactured using continuous processes; products manufactured using resin transfer moulding (RTM); and pipes and tanks. Looking to the future, the glass fibre reinforced plastics industry in Europe is expected to continue to grow as research into further applications bears fruit and improvements are made to materials and processing methods.

Contents

SUMMARY

INTRODUCTION

EUROPEAN PRODUCTION OF GLASS FIBRE REINFORCED PLASTICS BY SEGMENT

Sheet moulding compound (SMC) components and bulk moulding compound (BMC) components

Products manufactured using open mould processes

Glass mat reinforced thermoplastics (GMT) and long fibre reinforced thermoplastics (LFT)

Sheet components and pultruded components manufactured using continuous processes

Products manufactured using resin transfer moulding (RTM)

Pipes and tanks

EUROPEAN PRODUCTION OF GLASS FIBRE REINFORCED PLASTICS BY COUNTRY OR REGION

Germany

Eastern Europe

Spain and Portugal

Italy

UK and Ireland

France

Belgium, the Netherlands and Luxembourg

Denmark, Finland, Norway and Sweden

Austria and Switzerland

OUTLOOK
