# **Abstracts**

This 2015 edition of our flagship series of reports contains statistical data, information and insight into the textile and apparel industries in the EU. The report identifies important trends and includes information on: production of textiles and clothing; textile and clothing imports by supplying country; textile and clothing exports by destination country; and textile and clothing trade balances. It also analyses trade and production activities in each EU member state and provides an outlook. The report presents a wealth of information and is essential for anyone who is considering sourcing from, selling to or investing in the EU and its leading supplying countries and export markets. During 2014, textile production in the EU increased but clothing production declined to its lowest level in several years. Exports of textiles and clothing to countries outside the EU increased in value and volume, and there was an increase in EU textile and clothing imports. Also, there were increases in the average prices of clothing imports from 14 of the leading 20 clothing supplying countries. However, there were declines in the average prices of textile imports from 13 of the leading 20 supplying countries.

### **Contents**

#### **SUMMARY**

#### **EU: GENERAL ECONOMIC TRENDS**

GDP growth
Consumer price inflation
Private consumption
Consumer expenditure on clothing and footwear
Currency exchange rates

#### **EU: PRODUCTION OF TEXTILES AND CLOTHING**

Textile production
