## **Abstracts**

The Aerospace Stainless Steel and Superalloy Fasteners Market size was valued at US\$ 753.90 million in 2023 and is expected to reach US\$ 1,334.44 million by 2031. The Aerospace Stainless Steel and Superalloy Fasteners Market is estimated to record a CAGR of 7.4% from 2023 to 2031.

The Global Aerospace Stainless Steel and Superalloy Fasteners Market is segmented into North America, Europe, and Asia Pacific. China, Japan, Taiwan are among the main contributors to the Asia Pacific Aerospace Stainless Steel and Superalloy Fasteners Market. Several global players are expanding their MRO facilities in Asia Pacific. For instance, in July 2022, Safran AB (one of the leading suppliers of key aircraft components, including landing gear, wheels and brakes, and wiring) announced an investment of US\$ 305 million in India. The company is planning to invest US\$ 204.15 million in one of the largest MRO facilities in the world in Hyderabad. Investments by global players will boost the growth of aircraft MRO services, thereby driving the aerospace stainless steel and superalloys fasteners market growth. The supply chain for aerospace stainless and superalloy fasteners in China, Japan, Taiwan,

India, and South Korea is supported by a distinct range of companies that concentrate on manufacturing and distributing high-end fasteners. These companies are important in meeting the mounting demand for aerospace applications, confirming compliance with strict industry standards, and aiding the overall growth of the aerospace sector in Asia Pacific.

Based on material type, the market is categorized into stainless steel and superalloy. The superalloy is further segmented into A286, Inconel 718, Waspaloy, and others. The stainless-steel segment held the largest Aerospace Stainless Steel and Superalloy Fasteners Market share in 2023. A few stainless-steel fastener types are screws, bolts, nuts, studs, flat washers, wingnuts, and lock washers. Stainless steel and diverse grades of steel-based alloys usually show significant strength than other materials. Steel also requires certain treatments to make it resistant to heat and corrosion. Stainless steel's major attribute of self-healing corrosion resistance offers an affordable and lower-maintenance substitution to fasteners, which are fabricated from other materials. Stainless 300 and 400 Series are commonly utilized in aerospace fasteners for their durability and resistance to oxidation and staining.

Precision Castparts Corp.; LISI Aerospace SAS; TriMas Aerospace; National Aerospace Fasteners Corp.; Howmet Aerospace Inc.; STANLEY Engineered Fastening; Saturn Fasteners, Inc.; B&B Specialties, Inc.; Raychin Limited; and MS Aerospace are among the prominent players profiled in the Aerospace Stainless Steel and Superalloy Fasteners Market report. Several other major players were also studied and analyzed in the Aerospace Stainless Steel and Superalloy Fasteners Market report to get a holistic view of the market and its ecosystem.
