## Abstracts

The household water dispensers market in Asia Pacific is expected to grow from US\$ 2,173.82 million in 2022 to US\$ 3,151.40 million by 2028. It is estimated to grow at a CAGR of 6.4% from 2022 to 2028.

### Increase in Demand for Clean Drinking Water Fuel Asia Pacific Household Water Dispensers Market

Rising levels of groundwater contamination and increasing concerns regarding tap water quality have resulted in a significant consumer shift in the adoption of household water dispensers. In addition, concerns related to the chlorine content in drinking water and related health issues such as asthma, bladder cancer, and heart diseases in developed countries have surged the demand for household water dispensers. Moreover, the increasing groundwater contamination has resulted in a rise in waterborne illnesses, such as cholera, E. coli, and gastrointestinal illnesses, augmenting the demand for household water dispensers. In addition, household water dispensers help remove minerals and chlorine and its byproducts, which lowers the threat of rectal and bladder cancer. Additionally, clean drinking water helps improve the digestive system, boost the overall immune system, and improve skin health. Thus, the increasing demand for clean drinking water owing to the rise in awareness about its health benefits is propelling the Asia Pacific household water dispensers market growth.

## Asia Pacific Household Water Dispensers Market Overview

The Asia Pacific household water dispensers market is broadly segmented into Australia, Japan, India, China, South Korea, and the Rest of Asia Pacific. The household water dispenser market in Asia Pacific is growing significantly. The increasing awareness about the importance of staying hydrated and consuming clean water is driving the sales of household water dispensers in the region, as many water dispensers may have inbuilt filtration systems. The rise in concerns about water pollution and contaminants in tap water is leading to the growing adoption of household water dispensers as a safer and more convenient option for obtaining clean drinking water. Rising disposable income levels and changing lifestyles also contribute to the surging demand for water dispensers in the region. Moreover, the convenience of having access to clean hot or cold water at any time without having to boil or refrigerate it is a crucial factor driving the sales of household water dispensers with heating and cooling functions. Furthermore, using water dispensers at home eliminates the need for bottled water, which can save money and reduce plastic waste. Rapidly growing population base and increasing urbanization indirectly contribute to the region's market growth. Also, the proliferation of e-commerce platforms has made it easier for consumers to purchase water dispensers online, further boosting sales. In addition, Asia Pacific is home to several leading manufacturers of water dispensers, which has led to increased competition and innovation in the market.
