Abstracts

The Asia Pacific immunodiagnosics market is expected to grow from US\$ 2,409.90 million in 2023 to US\$ 4,252.35 million by 2030. It is estimated to grow at a CAGR of 8.5% from 2023 to 2030.

Technological Advancements in Immunodiagnosics Drive Asia Pacific Industrial Robotics Market

The current trend in immunodiagnosics is microfluidics and magnetic beads with potential commercialization. These sensitive, specific, and time-saving methodologies are essential in understanding and diagnosing health conditions, such as infectious diseases, metabolic disorders, and cardiac problems.

The increasing applications of immunodiagnosics solutions encouraged the development of targeted treatments and therapies for precision health. The prominent market players also promote assay technologies, microfluidics, and magnetic beads. For immunoassays, magnetic particles, such as Sera-Mag beads, offer a convenient

alternative to plate-based ELISAs, as both rely on the same assay principle. Merck KGaA launched the Magna Chip Protein A magnetic beads. This recombinant Protein A is covalently bound to magnetic beads for chromatin immunoprecipitations (Chip assays), providing users with a faster, reproducible, and more efficient reagent for collecting immunocomplexes than agarose beads.

In microfluidics, some immunodiagnosics target single biomarkers. However, a recent trend shows the detection of multiple analytes according to the complexity and the need to make early reliable diagnoses.

In September 2023, Siemens Healthineers released its new CE-marked SARS-CoV-2/FluA/FluB/HRSV assay, a PCR test, and the CLINITEST Rapid COVID-19 + Influenza Antigen Test. The new FTD SARS-CoV-2/FluA/FluB/HRSV assay enables comprehensive and semi-automated molecular testing for seasonal respiratory pathogens. The combination PCR test detects and differentiates clinically relevant viruses such as SARS-CoV-2, Influenza A, Influenza B, and HRSV A/B.

Asia Pacific Immunodiagnosics Market Overview

According to Statista, a large chunk of the Chinese population was suffering from chronic diseases in 2020. Almost 80% of deaths among people aged 60 years in the country are caused due to chronic NCDs, of which the most severe are ischemic heart disease, stroke, chronic obstructive pulmonary disease (COPD), and Type II diabetes. According to China Blueprint, immunological diagnosis has exceeded biochemical diagnosis (accounting for 27%), and the in vitro diagnostics (IVD) market has gone mainstream in China. However, compared to developed countries, there is still room for alternative biochemical diagnosis to expand in China's immunodiagnosics market, as the average ratio of biochemical to immunization diagnosis is about 1:2, according to statistical data from several agencies. As technological innovation advances with the growing need for high-end testing, diagnostics is expected to consolidate its mainstream status.

Furthermore, collaborations between organizations are increasing for developing and producing assays. For instance, in December 2023, Ortho Clinical Diagnostics Trading and Shanghai Medconn Biotechnology signed an agreement as part of a joint venture to develop and manufacture assays for the VITROS immunodiagnosics platform in China. The expertise of Ortho Clinical Diagnostics Trading in developing and designing in vitro diagnostics (IVD) technologies for POC settings, clinical labs, and transfusion medicine will propel the growth of the Asia Pacific immunodiagnosics market in the coming

years.

Asia Pacific Immunodiagnosics Market Revenue and Forecast to 2030 (US\$ Million)

Asia Pacific Immunodiagnosics Market Segmentation

The Asia Pacific immunodiagnosics market is segmented into product, clinical indication, end user, and country.

Based on product, the Asia Pacific immunodiagnosics market is segmented into enzyme-linked immunosorbent assays (ELISA), chemiluminescence immunoassays (CLIA), radioimmunoassays (RIA), and others. In 2023, the enzyme-linked immunosorbent assays (ELISA) segment registered a largest share in the Asia Pacific immunodiagnosics market. The chemiluminescence immunoassays (CLIA) segment is further segmented into vitamin D assay market, HIV detection market, HIV ag/ab combo assay market, and other tests.

Based on clinical indication, the Asia Pacific immunodiagnosics market is segmented into infectious diseases, hepatitis HIV, endocrinology, gastrointestinal, metabolics, and others. In 2023, the infectious diseases segment registered a largest share in the Asia Pacific immunodiagnosics market. The infectious diseases segment is further segmented into COVID-19, tuberculosis, lyme, infection management, zika, treponema, torch, measles and mumps, VZV, and EBV. The endocrinology segment is further segmented into hypertension, growth, diabetes, thyroid, and reproductive endocrinology.

Based on end user, the Asia Pacific immunodiagnosics market is segmented into hospitals, clinics, diagnostic laboratories, academic & research institutes, and others. In 2023, the hospitals segment registered a largest share in the Asia Pacific immunodiagnosics market.

Based on country, the Asia Pacific immunodiagnosics market is segmented into China, Japan, India, Australia, South Korea, and the Rest of Asia Pacific. In 2023, China registered a largest share in the Asia Pacific immunodiagnosics market.

Abbott Laboratories; bioMerieux SA; Danaher Corp; DiaSorin SpA; F. Hoffmann-La Roche Ltd; PerkinElmer Inc; Shenzhen Mindray Bio-Medical Electronics Co., Ltd.; Siemens Healthcare GmbH; Svar Life Science AB; and Thermo Fisher Scientific Inc are some of the leading companies operating in the Asia Pacific immunodiagnosics market.
