Abstracts

The Asia Pacific pediatric orthopedic implants market was valued at US\$ 820.94 million in 2022 and is expected to reach US\$ 1,909.34 million by 2030; it is estimated to grow at a CAGR of 11.1% from 2022 to 2030.

Unmet Needs of Pediatric Orthopedic Patients Drives the Asia Pacific Pediatric Orthopedic Implants Market

Key players operating in the pediatric orthopedic implant market are engaged in developing and commercializing innovative products and technologies specifically designed to address the unmet clinical needs of pediatric orthopedic patients and satisfy the demands of orthopedic surgeons. Osteogenesis imperfecta (OI) is a genetic bone disorder and is treated with rods of fixed lengths. However, telescopic implants can extend as the child grows, reducing the number of surgeries they need. These implants result in an improved quality of life for children with skeletal deformities of long bones. Further, the ability to manufacture and provide customized orthopedic implants by using 3D printing technology in personalized medicine has broadened the applications of these products.

Health expenditures in developing countries rise with the increase in the burden of different diseases. Thus, government initiatives to improve healthcare infrastructure to support modern orthopedic practices in response to an upsurge in the prevalence of bone deformities among children are likely to create significant opportunities for major players in the Asia Pacific pediatric orthopedic implants market.

Asia Pacific Pediatric Orthopedic Implants Market Overview

The Asia Pacific pediatric orthopedic implants market is further segmented into China, Japan, India, Australia, South Korea, and the Rest of Asia Pacific. The market growth in this region is attributed to the increasing focus of market players on this region and the introduction of new products or therapies. Moreover, the rising prevalence of orthopedic disorders, an upsurge in healthcare spending, and access to advanced technologies help boost the growth of the Asia Pacific pediatric orthopedic implants market in Asia Pacific.
