Abstracts

Body-in-white is referred to a stage in the manufacturing and design of automotive vehicles. It is basically the assembly of panels and frames made up of homogenous materials (such as steel, aluminum, and composites). Growing demand for reduced vehicle weight thus, improving overall vehicle mileage is expected to transform the body-in-white market. It is expected that aluminum cast metal will be dominating the body-in-white market in the near future, with light weight and anti-corrosion functionalities being one of the major trends.

Growing importance of vehicle safety, awareness towards ENCAP ratings and aerodynamics will drive the market in coming years whereas reasons such as high composites price can act as a restraining factor in the market. The rise of monocoque body structure has opened a potential avenue of application for body-in-white market and will bring new opportunities in the market.

The “Global Automotive Body-in-white Components Market Analysis to 2025” is a specialized and in-depth study of the automotive body-in-white industry with a focus on

the global market trend. The report aims to provide an overview of global body-in-white market with detailed market segmentation by component position, material type, component type, body structure and geography. The global body-in-white market is expected to witness high growth during the forecast period. The report provides key statistics on the market status of the leading market players and offers key trends and opportunities in the market.

The report provides a detailed overview of the industry including both qualitative and quantitative information. It provides overview and forecast of the global body-in-white market based on product and application. It also provides market size and forecast till 2025 for overall body-in-white market with respect to five major regions, namely; North America, Europe, Asia-Pacific (APAC), Middle East and Africa (MEA) and South America (SAM). The market by each region is later sub-segmented by respective countries and segments. The report covers analysis and forecast of 15 countries globally along with current trend and opportunities prevailing in the region.

Besides this, the report analyzes factors affecting market from both demand and supply side and further evaluates market dynamics effecting the market during the forecast period i.e., drivers, restraints, opportunities, and future trend.

Also, key body-in-white market players influencing the market are profiled in the study along with their SWOT analysis and market strategies. The report also focuses on leading industry players with information such as company profiles, products and services offered, financial information of last 3 years, key development in past five years. Some of the key players influencing the market are Magna International Inc., Hyundai Rotem, and BENTELER International Inc. among others.

4 MARKET LANDSCAPE

4.1 Market Segmentation

4.1.1 Global Automotive BIW Component Market – By Material Type

4.1.2 Global Automotive BIW Component Market – By Component Position

4.1.3 Global Automotive BIW Component Market – By Components Type

4.1.4 Global Automotive BIW Component Market – By Geography

5 GLOBAL AUTOMOTIVE BIW COMPONENT MARKET – KEY INDUSTRY DYNAMICS

5.1 Key Market Drivers

5.1.1 Robust growth in passenger car production globally is fueling the revenue growth

5.1.2 Increasing adoption of high cost material combined with rise in overall consumption

5.2 Key Market Restraints/Challenges

5.2.1 High capital requirement for offering high-end manufacturing capabilities

5.3 Key Market Opportunities

5.3.1 Asian Countries primarily China, Japan, Korea, and India represent significant revenue growth opportunity for global suppliers

5.3.2 Developing multi-material capabilities and continued R&D investments will create revenue growth potential for component suppliers

5.4 Future Trends

5.4.1 Light weight vehicles paving the way for multi-material components
