## Abstracts

The CT Scanner market was valued US\$ 6.94 billion in 2024 and is projected to reach US\$ 10.17 billion by 2031; it is expected to register a CAGR of 5.7% during 2025–2031.

The Middle East & Africa (MEA) region presents a mixed but growing opportunity for the CT scanner market, driven by health system modernization, rising disease burden, and improving access to advanced medical technologies. High-income countries such as Saudi Arabia, the UAE, and Qatar are investing heavily in healthcare infrastructure under national transformation programs, which include upgrading diagnostic capabilities with high-slice CT systems and AI-enabled platforms. Strategic partnerships with global vendors, foreign direct investment, and public-private collaboration often support these efforts. Additionally, medical tourism is an emerging driver in parts of the Middle East,

leading to higher demand for premium imaging services and advanced diagnostic equipment in private hospitals. Across Africa, although the market is less mature, growth is supported by public health campaigns, increasing donor funding, and expanding urban healthcare networks. The prevalence of non-communicable diseases such as cancer and cardiovascular disorders, along with trauma and infectious diseases, is intensifying demand for CT imaging across both primary and tertiary care facilities. The adoption of mobile or mid-tier CT units is gaining popularity due to their cost-effectiveness and operational flexibility. Financing models like leasing and service-based contracts are also helping mitigate capital expenditure constraints, particularly in lower-income markets. However, the region still faces significant barriers, including limited trained personnel, import restrictions, maintenance challenges, and delayed regulatory approvals. Vendor-driven training programs and localized service models are increasingly used to address these gaps. In summary, MEA offers growing demand and investment momentum, particularly in Gulf countries, though infrastructure and human capital limitations continue to constrain the full market potential.

GE HealthCare Technologies Inc, Siemens Healthineers AG, Hitachi High-Tech Corp, Medtronic Plc, Koninklijke Philips NV, Neusoft Medical Systems, PLANMED OY, Accuray Incorporated, Canon Medical Systems Corp, and Shanghai United Imaging Healthcare Co., LTD are among the key global CT Scanner players that are profiled in this market study.

The overall global CT Scanner market size has been derived using both primary and secondary sources. Exhaustive secondary research has been conducted using internal and external sources to obtain qualitative and quantitative information related to the global CT Scanner market size. The process also helps obtain an overview and forecast of the market with respect to all the market segments. Also, multiple primary interviews have been conducted with industry participants to validate the data and gain analytical insights. This process includes industry experts such as VPs, business development managers, market intelligence managers, and national sales managers, along with external consultants such as valuation experts, research analysts, and key opinion leaders, specializing in the global CT Scanner market.

## **Reason to buy**

Save and reduce time carrying out entry-level research by identifying the growth, size, leading players and segments in the global CT Scanner market.

Highlights key business priorities in order to assist companies to realign their

business strategies

The key findings and recommendations highlight crucial progressive industry trends in the global CT Scanner market, thereby allowing players across the value chain to develop effective long-term strategies

Develop/modify business expansion plans by using substantial growth offering developed and emerging markets

Scrutinize in-depth global CT Scanner market trends and outlook coupled with the factors driving the market, as well as those hindering it.

Enhance the decision-making process by understanding the strategies that underpin commercial interest with respect to client products, segmentation, pricing and distribution
