Increasing Prevalence of Respiratory Diseases Fuels Europe Arterial Blood Gas Kits Market

Chronic obstructive pulmonary disease (COPD), asthma, pneumonia, and other respiratory diseases are creating a huge burden on the public healthcare system in various countries across the world. Smoking, infections, and genetic factors can cause serious respiratory complications. Patients suffering from respiratory disorders usually experience breathing issues and oxygen shortages. Arterial blood gas (ABG) test is carried out to measure the amount of oxygen and carbon dioxide dissolved in arterial blood. The test helps deliver care to patients suffering from acute and chronic respiratory disease. Thus, the growing prevalence of acute and chronic respiratory diseases propels the demand for arterial blood gas test kits.
