Abstracts

The Europe carboxy therapy market is expected to grow from US\$ 26.78 million in 2022 to US\$ 54.07 million by 2028. It is estimated to grow at a CAGR of 12.4% from 2022 to 2028.

Growing Uptake of Noninvasive Aesthetic Procedures is Driving the Europe Carboxy Therapy Market

The World Health Organization (WHO) recognizes waste reduction in healthcare delivery as an essential aspect of strengthening healthcare systems. Technological advancements have led to the development of surgical approaches that minimize waste and achieve better results with available resources. Minimally invasive surgeries (MIS) and non-invasive procedures are among the approaches that result in low waste generation and reduced medical expenses. Moreover, these procedures ensure low absenteeism at the workplace, which has a net positive effect on the productivity of an economy. Minimal invasiveness results in faster recovery, lesser scarring, limited stress, and better patient satisfaction. The modern concept of natural and harmonious

rejuvenation is based on a comprehensive, three-dimensional, multi-layered approach that combines several active ingredients and techniques in procedures, such as skin relaxation, surface renewal, and skin tightening, depending on the specific patient's needs. Since the appearance of the skin is considered an essential factor in well-being and health, the number of aesthetic procedures performed is increasing steadily. Further, nonsurgical procedures include facial injections, which help correct facial lines, wrinkles, cellulite reduction, and unwanted fat reduction with minimal side effects. The International Society of Aesthetic Plastic Surgery (ISAPS) defines a nonsurgical cosmetic procedure as an effective and safe procedure for those who are willing to undergo subtle enhancement and surgical result enhancement with lower recovery periods; these procedures often do not require extensive training, unlike surgical procedures that are associated with greater risks. Thus, the surge in the uptake of minimally invasive and noninvasive aesthetic procedures is driving the Europe carboxy therapy market .

Europe Carboxy Therapy Market Overview

European carboxy therapy market is divided into Germany, the UK, France, Italy, Spain, and the Rest of Europe. Germany is one of the largest markets for carboxy therapy. According to the International Society of Plastic Surgery (ISAPS), in 2019, more than 900,000 cosmetic procedures were performed in Germany. An increase in demand for aesthetic or cosmetic surgeries has been reflected in the changing attitudes toward youth and beauty. Many advanced nonsurgical and minimally invasive techniques for performing aesthetic procedures were being developed in the 21st century. The millennials, aged 18 to 30 years, are opting for cosmetic surgeries and procedures. German dermatology departments are also increasingly offering many of these methods. Furthermore, the presence of major players in the region and continuous technological advancements in aesthetic medicine is augmenting the market share. Thus, the factors mentioned above are contributing to the market growth.

Europe Carboxy Therapy Market Revenue and Forecast to 2028 (US\$ Million)

Europe Carboxy Therapy Market Segmentation

The Europe carboxy therapy market is segmented into type, application, end user, and country.

Based on type, the Europe carboxy therapy market is segmented into tabletop, portable, and others. The tabletop segment is expected to hold the largest market share by 2022.

Based on application, the Europe carboxy therapy market is segmented into aesthetic medicine, dermatology, angiology, gynecology, orthopedics and rheumatology, sports medicine, and others. The aesthetic medicine segment is expected to hold the largest market share by 2022. The aesthetic medicine segment is further subsegmented into cellulite, stretch marks, alopecia, and dark under-eye circles.

Based on end user, the Europe carboxy therapy market is segmented into hospitals, aesthetic clinics, and wellness center. The hospitals segment is expected to hold the largest market share by 2022.

Based on country, the Europe carboxy therapy market is segmented into Germany, the UK, France, Italy, Spain, and the Rest of Europe. The Rest of Europe dominated the market share in 2022.

Carbossiterapia Italiana; Cosmo Pro Ltd.; DTA Medical; Kastner-Praxisbedarf; MBE Medical Division; and Mezopharma are among the leading companies operating in the Europe carboxy therapy market.
