## Abstracts

The Europe gastric buttons market is expected to grow from US\$ 100.71 million in 2022 to US\$ 152.24 million by 2028; it is estimated to record a CAGR of 7.1% from 2022 to 2028 .

### Increasing Preference for Low-Profile Tubes to Boost Market Growth in Coming Years

The placement of low-profile gastrostomy buttons (LPBs) is safer, and it provides a better outcome compared to long gastrostomy tubes (LGTs). Low-profile balloon gastrostomy tubes have a compact design and are often preferred due to their aesthetic appearance and ease of replacement. Low-profile buttons are preferred in pediatric patients who are at a higher risk of accidentally pulling out longer tubing or dislodging the tubing. Low-profile tubes are sized based on the caliber of the access tube and the stem length.

Companies are focusing on introducing low-profile buttons to enhance delivery systems. These devices are likely to offer benefits such as flexibility of placement, via a mature gastrostomy tract. They are available as an initial placement option, the extension set attached make feeding easier over long gastrostomy tubes (LGTs). A few of the recent developments related to the gastric buttons market are mentioned below:

In March 2021, Applied Medical Technology, Inc. (AMT) announced the launch of a low-profile micro G-JET. The micro G-JET was designed to meet the enteral nutrition needs of pediatric patients. The new device offers gastric lengths of 0.8–2.5 cm and jejunal lengths of 10 cm, 15 cm, 22 cm, and 30 cm.

In November 2021, AMT announced the launch of the 10F MiniACE balloon button that is FDA-cleared for Antegrade Continence Enemas. Patients who depend on antegrade enemas as part of their bowel management program no longer have to struggle with their Chait Trapdoor; by expanding the MiniACE portfolio to include a 10F option, the company facilitates a convenient option of transitioning patients from their current cecostomy/appendicostomy device to a balloon button device with minimal dilation.

Thus, the growing preference for such low-profile tubes is likely to fuel the European gastric buttons market growth in the future .

## Europe Gastric Buttons Market Overview

The European gastric buttons market is segmented into Germany, the UK, France, Italy, Spain, and the Rest of Europe. The region holds a significant share of the global gastric buttons market. Europe occupies a significant position in the gastric buttons market and is estimated to register a notable CAGR during the forecast period. The projected growth of the market in this region is attributed to factors such as the rise in the elderly population—coupled with the surging incidence of chronic illnesses such as cancer, neurological disorders, diabetes, and gastrointestinal diseases—in the region.
