Abstracts

The Europe hemodynamic monitoring system market is expected to grow from US\$ 434.63 million in 2022 to US\$ 616.34 million by 2028. It is estimated to grow at a CAGR of 6.0% from 2022 to 2028.

Growing Geriatric Population Drives Hemodynamic Monitoring System Market in Europe

Higher cases of CVDs occur among geriatric people. According to the Eurostat, over one fifth, i.e., 20.8 % of the European Union population was aged 65 or more in 2021. As per the report 'The UK's ageing population' by the House of Commons (UK Parliament), the UK's population is witnessing a massive age shift. In 2019, there were more than 12.3 million people aged 65 or more in the region and the figure is projected to reach 17.4 million, i.e., around 24% of the entire population by 2043. The rising geriatric population is expected to lead to various chronic health conditions, such as high blood pressure, obesity, and diabetes, the primary causes of cardiovascular diseases. The monitoring services for the geriatric population are widely provided in home care settings. Therefore, the demand for hemodynamic monitoring systems in

these settings is growing, thereby fostering the growth of Europe hemodynamic monitoring system market.
