Abstracts

The Europe industrial absorbents market is expected to grow from US\$ 963.79 million in 2022 to US\$ 1,253.45 million by 2028. It is estimated to grow at a CAGR of 4.5% from 2022 to 2028.

Biodegradable Absorbents Drive Europe Industrial Absorbents Market

Biocompatibility and degradability are the two main aspects of superabsorbent biodegradable polymers. These materials combine synthetic and renewable raw materials. Superabsorbent materials are essential components in baby diapers. To reduce environmental impact, industrial absorbent manufacturers are focusing on innovations in all-cotton oil absorbents. Biodegradable absorbents are highly popular in the industrial absorbent market since they address the challenges related to microplastic pollution. Companies are focusing on expanding their product offerings to local garages and offshore facilities to solve the problem of oil spills. The companies in the Europe industrial absorbents market are also looking for innovative natural materials to develop lightweight absorbents. Industrial absorbents made with natural materials help manufacturing companies comply with environmental regulations. These absorbents are being extensively used to clean hazardous hydrocarbon oil spills in the most environmentally friendly way. Thus, companies in the Europe industrial absorbents market are significantly investing in research and development to develop eco-friendly

absorbents that soak petroleum products.

Europe Industrial Absorbents Market Overview

The Europe industrial absorbents market is segmented into Germany, France, Italy, the UK, and Russia. The increasing utilization of industrial absorbents from various industries is propelling the market's growth in Europe. The strong presence of the chemical industry in countries such as Germany, France, the UK, and Italy creates a huge demand for industrial absorbents from the chemical industry. Further, Russia is one of the largest oil & natural gas producers in the world, creating a demand for industrial absorbents from the oil & gas sector. Industrial absorbents can absorb all oils and chemicals spills and prevent its discharge into the land and/or water. The strong manufacturing industry from countries such as Germany, France, and the UK drives industrial absorbents market growth in the region. The growing automotive industry is also propelling the demand for industrial absorbents in the region. The European industrial absorbents market is expected to witness significant growth during the forecast period due to robust manufacturing and automobile sectors in countries such as Germany and Spain. Moreover, the food processing industry is one of the major sectors that are likely to fuel the growth of the Europe industrial absorbents market. Industrial absorbents are used for absorbing excess water from foods such as seafood, poultry, fruits, vegetables, beef, and pork meat to increase the products' shelf life and avoid bacterial growth. The increasingly stringent regulations imposed by governmental bodies in Italy and France are also among the major reasons promoting the use of industrial absorbents in these countries.

Europe Industrial Absorbents Market Segmentation

The Europe industrial absorbents market is segmented into product type, type, end-use industry, and country.

Based on product type, the Europe industrial absorbents market is segmented into pads, rolls, pillows, booms, socks, and others. In 2022, the booms segment registered a largest share in the Europe industrial absorbents market.

Based on type, the Europe industrial absorbents market is segmented into universal, oil-only, and hazmat/chemical. In 2022, the hazmat/chemical segment registered a largest

share in the Europe industrial absorbents market.

Based on end-use industry, the Europe industrial absorbents market is segmented into oil and gas, chemical, food processing, healthcare, automotive, and others. In 2022, the oil and gas segment registered a largest share in the Europe industrial absorbents market.

Based on country, the Europe industrial absorbents market is segmented into Germany, France, the UK, Italy, Russia, and the Rest of Europe. In 2022, the Rest of Europe segment registered a largest share in the Europe industrial absorbents market.

3M Co; Ansell Ltd; Brady Corp; Decorus Europe Ltd; Fentex Ltd; Meltblown Technologies Inc; Oil-Dri Corp of America; Schoeller Industries GmbH; and Tolsa SA are the leading companies operating in the Europe industrial absorbents market.
