Abstracts

The Europe pediatric orthopedic implants market was valued at US\$ 1,170.14 million in 2022 and is expected to reach US\$ 2,554.90 million by 2030; it is estimated to grow at a CAGR of 10.3% from 2022 to 2030.

Use of Resorbable Implants and Increasing Access to Pediatric Orthopedic Treatment Drives the Europe Pediatric Orthopedic Implants Market

An increase in awareness regarding technologically advanced products, mainly through digital marketing channels, propels the demand for high-quality medical treatments for orthopedic defects in the pediatric population, subsequently contributing to the adoption of orthopedic implants designed for children. The most used implants are polymer- and ceramic-based ones. Nowadays, biodegradable, i.e., resorbable implants are preferably used due to their beneficial properties. An anterior cruciate ligament (ACL) reconstruction and ankle fractures are the most observed indications that are treated using resorbable implants. Using these implants eliminates the need for implant removal operations, which often lead to prolonged and costly hospital stays; long hospital stays are not considered as a convenient option while treating pediatric patients.

Governments of developing and developed countries engage in increasing awareness

and management of orthopedic diseases. Governments help in creating awareness regarding bone deformities among pediatric patients and help in providing treatment to large populations thereby creating demand for pediatric orthopedic implants and anticipated market growth.

Europe Pediatric Orthopedic Implants Market Overview

The European pediatric orthopedic implants market is segmented into Germany, the UK, France, Italy, and Spain. Market growth in the region is attributed to the rising number of birth deformities along with rising demand of orthopedic implants for children in the region, accelerating market growth and changing demographics and budget restrictions. Moreover, increasing R&D activities result in the rapid development of new knee and elbow fixation approaches and means of treatment.
