The Europe USB camera controller market is expected to grow from US\$ 373.97 million in 2023 to US\$ 938.90 million by 2030. It is estimated to grow at a CAGR of 14.1% from 2023 to 2030.

### Growing Mining Activities Fuels Europe USB Camera Controller Market

The rising demand for different metals and minerals is increasing mining activities worldwide. Various countries are increasing their investment to expand their mining site to fulfill this rising demand. Thus, such growing mining production worldwide is expected to raise the demand for security and monitoring to ensure the safety of employees, equipment, or materials. This increasing need for real-time monitoring is raising the demand for USB cameras with controllers at the mining site, as the authorities can check every movement at the mining site by moving the camera through its controller and focusing on any particular area when needed. Through this, the authorities can detect any suspicious activities at the site and provide an alert in case of any danger. Hence, the growing mining activities worldwide are boosting the growth of the USB camera controller market.
