Abstracts

The Europe vision care market is expected to grow from US\$ 23,743.83 million in 2022 to US\$ 31,199.09 million by 2028; it is estimated to grow at a CAGR of 4.7% from 2022 to 2028.

Rising Funds for Eye Care Research

Extensive ongoing research across the Europe to identify new treatments for eye diseases is likely to favor the vision care market growth in the coming years. The institute also funds trials to develop cutting-edge therapies for blinding diseases. In 2017, the NEI launched a 3D Retina Organoid Challenge Competition (3D-ROC) to develop functioning mini-retinas from human stem cells. It announced the prize money of US\$ 1.1 million to the team with the best replication of retina structure and function.

The Karolinska Institutet, Sweden, offers grants to promote research on eye diseases. In 2020, the institute announced SEK 50,000–150,000 (US\$ 5,912.88–17,738.64) per person funding for new research projects on eye diseases. These funds will be used to provide maximum flexibility in developing and expanding eye research programs and fostering creative planning beyond the scope of restricted project grants. Thus, increasing funds for eyecare research are likely to bring new trends in the vision care market to trigger its growth.
