Abstracts

The Europe wooden interior doors market is expected to grow from US\$ 4,664.19 million in 2022 to US\$ 6,464.52 million by 2028. It is estimated to grow at a CAGR of 5.6% from 2022 to 2028.

Use of CNC Machines for Woodworking Fuels Europe Wooden Interior Doors Market

The technology in woodworking is constantly evolving. Interior door manufacturers are getting lean toward utilizing advanced technology to remain in the race of changing trends. The interior door manufacturers are taking help of CNC machines to process wood products such as MDF, plywood, and wood. Since, CNC machines provide higher productivity and efficiency, the scope of CNC is increasing. Additionally, CNC works smoothly on wood and is capable to create patterns in an easy manner, which is another factor driving the penetration rate of CNC within wooden interior doors. Below mentioned are some of the benefits fueling the CNC wood carving demand:

- Enhance quality and accuracy
- Maximize scalability and productivity
- Decrease labor cost, lower human errors and material waste to 30%.

Traditionally, the manual wooden door relies on human labors and results in low output

and high price. Therefore, wooden door manufacturers are using wood carving machine to speed up production and product consistency.

Europe Wooden Interior Doors Market Overview

Europe is segmented into Germany, France, Italy, the UK, Russia, Kazakhstan, Belarus, and Uzbekistan. The construction sector has been booming in Europe since 2014, mainly as far as new construction is concerned. The construction industry in Europe plays an important role in the economy, employing about 18 million people in the workforce and contributing to 9% of the total GDP of the European Union. The construction sector creates new residential, industrial, and commercial buildings for Europeans to work and live in, and builds infrastructure, maintains and repairs older structures and buildings. Europe is increasingly involved in initiating various major construction projects, which increases the adoption of wooden interior doors in the European Union. Below is the list of a few major construction projects initiated in Europe during Q1 2022.

- **Krampnitz Housing Development (US\$ 1,831 million):** The project involves the construction of the Krampnitz housing complex to provide living space for 10,000 people.
- **Ostendstraße 1-14 Commercial Buildings (US\$ 1,293 million):** This project aims to meet the growing requirement for office, retail, hotel, and commercial facilities for people in the region.

Such an increase in residential and nonresidential construction projects is further boosting the adoption of wooden interior doors in Europe.

The European Union accounts for approximately 5% of the world's forests. This is increasing the production volume of roundwood and sawnwood, further boosting the use of wood in the development of doors for commercial and residential sectors. Moreover, Europe's trade activities in wooden doors are increasing simultaneously. For instance,

- As per Volza's European Union Export data in December 2022, Europe is the second largest exporter of wooden doors, with 24,180 shipments.
- According to OEC World, the top importers of wooden doors, frames, and thresholds in 2020 were the UK (US\$ 291 Million), Germany (US\$ 195 M), Norway (US\$ 153 M),

and Sweden (US\$ 153 M).

Thus, huge growth in the construction industry and increase in export and imports across Europe are propelling the growth of the Europe wooden interior doors market.

Europe Wooden Interior Doors Market Revenue and Forecast to 2028 (US\$ Million)

Europe Wooden Interior Doors Market Segmentation

The Europe wooden interior doors market is segmented into type, mechanism, end-user, and country.

Based on type, the Europe wooden interior doors market is segmented into panel door, bypass door, bifold door, pocket door, and others. The panel door segment held the largest share of the Europe wooden interior doors market in 2022.

Based on mechanism, the Europe wooden interior doors market is segmented into swinging, sliding, folding, and others. The swinging segment held the largest share of the Europe wooden interior doors market in 2022.

Based on end-user, the Europe wooden interior doors market is segmented into residential and non-residential. The residential segment held the larger share of the Europe wooden interior doors market in 2022.

Based on country, the Europe wooden interior doors market is segmented into Germany, France, Italy, the UK, Russia, Kazakhstan, Belarus, Uzbekistan, and the Rest of Europe. The Rest of Europe dominated the share of the Europe wooden interior doors market in 2022.

Concept SGA Inc; JELD-WEN Holding Inc; Masonite International Corp; Puertas Salmar SA; and Puertas Sanrafael SA are the leading companies operating in the Europe wooden interior doors market.
