Abstracts

The marinades market size is projected to reach US\$ 18.44 billion by 2031 from US\$ 12.35 billion in 2024. The market is expected to register a CAGR of 5.9% from 2025 to 2031.

Marinades have gained significant attention in the global market due to their wide application in the food and beverage sector.

The global rise in multiculturalism, international travel, and exposure to diverse culinary traditions has transformed food preferences and significantly fueled the demand for marinades. Consumers around the world are increasingly adventurous with their taste choices, actively seeking out bold, authentic, and exotic flavors. This cultural shift has opened opportunities for marinade manufacturers to introduce products inspired by Asian, Mediterranean, Latin American, and Middle Eastern cuisines. For instance, soy-

based, teriyaki, chimichurri, tandoori, and peri-peri marinades have become household staples in many markets outside their regions of origin.

Globalization of food media—through cooking shows, social media, and online recipes—has accelerated this trend by making international flavors more accessible and appealing. Restaurants and quick-service outlets are also playing a key role, introducing fusion menus that combine local ingredients with global taste profiles. As consumers try these new flavors in restaurants, they seek similar experiences at home, driving retail demand.

Moreover, manufacturers are increasingly tailoring ethnic marinades to local palates by adjusting spice intensity, sweetness, or texture. The expansion of global supply chains and specialty ingredient sourcing has further supported this evolution. Ultimately, the growing enthusiasm for global cuisines not only diversifies the marinade market but also encourages innovation, cross-cultural flavor development, and sustained international market expansion.

The rising global consumption of meat and poultry is a fundamental driver of the marinade market's growth. As consumers continue to incorporate animal proteins into their diets, the demand for flavor-enhancing, tenderizing, and preservative solutions like marinades has surged. Marinades play a vital role in improving the texture, juiciness, and overall palatability of meat products, making them indispensable in both household cooking and the foodservice industry. Emerging economies—particularly in the Asia Pacific, Latin America, and Africa—have seen significant increases in meat consumption due to rising incomes, urbanization, and changing dietary preferences.

Some of the key players operating in the marinades market include Kerry Group Plc, Sentry Seasonings Inc, PK Kinder Co Inc, McCormick & Co Inc, Griffith Foods Inc, Solina Group SAS, Blendax Co, Carolina Ingredients LLC, Fuchs Gruppe (DF World of Spices GmbH), Badia Spices, Inc, and others. Players operating in the marinades market focus on providing innovative products at affordable prices to fulfill customer demand.
