Abstracts

The Middle East & Africa explosion proof lighting market was valued at US\$ 21.49 million in 2023 and is expected to reach US\$ 34.81 million by 2031; it is estimated to register a CAGR of 6.2% from 2023 to 2031.

Development of High-Power Explosion Proof Lighting Bolsters Middle East & Africa Explosion Proof Lighting Market

Explosion-proof lighting is mostly employed in hazardous and demanding conditions containing combustible gases and dust. These lights have a good explosion-proof function, making them suitable for IIA, IIB, and IIC explosive gas environments. In addition to their primary application in oil & gas, chemicals, pharmaceuticals, energy, and mining industries, they find potential applications in the railway, electric power, metallurgy, petroleum and petrochemicals, chemicals, steel, aviation, and shipbuilding

industries, among others. These industries generate a significant demand for high-power explosion-proof lighting to prevent explosions caused by equipment or other accidents at the working sites. High-power explosion-proof lighting products are designed to withstand harsh operating conditions, including high temperatures and extreme heat, making them ideal for use in hazardous locations. Dongguan Ming Yang Lighting Limited provides well-designed, high-power, explosion-proof lighting systems that operate with stability and endurance in high-temperature conditions. These systems feature high-strength aluminum radiators with an air convection structure, which helps withstand heat. A constant current drive, protection against short circuit and overvoltage protection, and high electromagnetic compatibility are among other noteworthy features of this system, which render them suitable for application in hazardous industries such as metallurgy, petroleum, petrochemical, chemicals, steel, oil & gas, marine, and mining. Thus, the development of high-power explosion-proof lighting systems is expected to create lucrative opportunities for the explosion-proof lighting market growth during the forecast period.

Middle East & Africa Explosion Proof Lighting Market Overview

Governments of countries in the Middle East & Africa are implementing various policies and regulations related to the expansion of the mining industry. The increasing adoption of explosion-proof lighting to ensure the safety of workers and the efficiency of mining operations drives the market in these regions. Explosion-proof lighting provides smooth movement of workers at mining sites and reduces the risk of accidents in the mining industry. Thus, the adoption of explosion-proof lighting in mining, oil & gas, chemical, construction, automotive, and other industries is expected to create growth opportunities for the explosion-proof lighting market.

Middle East & Africa Explosion Proof Lighting Market Revenue and Forecast to 2031 (US\$ Million)

Middle East & Africa Explosion Proof Lighting Market Segmentation

The Middle East & Africa explosion proof lighting market is categorized into type, light type, end user, and country.

Based on type, the Middle East & Africa explosion proof lighting market is segmented into fixed lighting, small and portable lighting, and mobile lighting. The fixed lighting segment held the largest market share in 2023. The fixed lighting segment is further sub-segmented into linear light, flood light, high bay light, bulkhead light, emergency light,

and others.

By light type, the Middle East & Africa explosion proof lighting market is segmented into LED light, high-intensity discharge light, fluorescent light, and incandescent light. The LED light segment held the largest market share in 2023.

Based on end user, the Middle East & Africa explosion proof lighting market is segmented into oil & gas, chemical, pharmaceutical, energy, manufacturing, food & beverages, military & defense, transportation & logistics, clean & medical, paint shop & application technology, agriculture & farming, public & community, and others. The oil & gas segment held the largest market share in 2023.

By country, the Middle East & Africa explosion proof lighting market is segmented into Saudi Arabia, the UAE, South Africa, and the Rest of Middle East & Africa. Saudi Arabia dominated the Middle East & Africa Explosion Proof Lighting Market share in 2023.

ABB Ltd, Eaton Corp Plc, Pepperl+Fuchs SE, ABTECH, Signify Holding (Philips), Emerson Electric Co, Rockwell Automation Inc, Adolf Schuch GmbH, Airfal International, R. STAHL AG, and NORKA are some of the leading companies operating in the Middle East & Africa explosion proof lighting market.

Reason to buy

Save and reduce time carrying out entry-level research by identifying the growth, size, leading players, and segments in the Middle East & Africa explosion proof lighting market.

Highlights key business priorities in order to assist companies to realign their business strategies.

The key findings and recommendations highlight crucial progressive industry trends in the Middle East & Africa explosion proof lighting market, thereby allowing players across the value chain to develop effective long-term strategies.

Develop/modify business expansion plans by using substantial growth offering developed and emerging markets.

Scrutinize in-depth Middle East & Africa market trends and outlook coupled with the factors driving the Middle East & Africa explosion proof lighting market, as
