## **Abstracts**

The Middle East & Africa gastric buttons market is expected to grow from US\$ 20.32 million in 2022 to US\$ 29.29 million by 2028; it is estimated to grow at a CAGR of 6.3% from 2022 to 2028.

Collective Untapped Potential of Emerging Economies to Boost Market Growth in Coming Years

The sales of gastric buttons are triggered by the rise in demand for better delivery systems for enteral nutrition (EN) and enteral feeding in home care settings. Leading players in the gastric buttons market are focused on increasing their penetration across emerging markets through the reinforcement and flourishing of their distribution networks, and augmentation of manufacturing capabilities. These initiatives by companies can be attributed to the rise in the aging population; high prevalence of cancer, neurological disorders, diabetes, and gastrointestinal diseases; increased disposable income; improved healthcare infrastructure; and growth of medical tourism in these countries. Thus, elevated investments in life science and healthcare research in emerging countries play a key role in the upgrading of the technology landscape in these countries. This factor, in turn, will support the gastric button market in the Middle East & Africa during the forecast period.

## Middle East & Africa Gastric Buttons Market Overview

The Middle East & Africa Gastric Buttons Market is categorized into the UAE, Saudi Arabia, South Africa, and the Rest of the Middle East & Africa. In 2021, Saudi Arabia was the largest market for gastric buttons in this region. The gastric buttons market in the Middle East & Africa is anticipated to grow at a CAGR of 6.3% during the forecast period. The projected market progress is due to the increasing incidences of cancer, neurological disorders, stroke, and paralysis across the region. Moreover, advancements in healthcare facilities help propel the market growth in this region.
