Abstracts

The Middle East & Africa USB camera controller market is expected to grow from US\$ 66.85 million in 2023 to US\$ 141.86 million by 2030. It is estimated to grow at a CAGR of 11.3% from 2023 to 2030.

Growth in Smart Cities Investments Fuels Middle East & Africa USB Camera Controller Market

In the rapidly developing landscape of smart cities across the Middle East, USB camera controllers are proving instrumental in a multitude of applications. For instance, in traffic management, USB cameras are strategically positioned at intersections, monitoring traffic flow and optimizing signal control to alleviate congestion. Public safety is greatly enhanced as these cameras are deployed in public spaces and transportation hubs, aiding in crime prevention and incident response. Additionally, they contribute to environmental monitoring by capturing data on air quality and weather conditions. Furthermore, USB camera controllers are integral to smart parking solutions, guiding drivers to available parking spaces and facilitating automated payments. Notably, these cameras also play a role in urban planning, providing visual data to inform infrastructure development decisions. In emergency situations, they offer real-time visuals for more effective response. With applications ranging from waste management to tourism promotion and data analytics, USB camera controllers are a significant component of Middle Eastern smart cities, supporting efficiency, safety, and sustainability.

Middle East & Africa USB Camera Controller Market Overview

The USB camera controller market in the MEA is segmented into South Africa, Saudi Arabia, the UAE, and the Rest of MEA. Favorable government initiatives toward the building of smart cities are propelling the demand for security solutions, such as USB cameras. As security is considered an integral part of an infrastructure, the deployment of smart security solutions has increased across the MEA. Also, increasing technological advancements such as providing high resolution and high image quality along with low light performance is helping users monitor their properties and protect their loved ones through PC, tablets, and other devices. Also, through USB camera controller, the user can monitor the place by controlling the movement of the camera and can help zoom and focus particular place when needed, further boosting the growth of the USB camera controller market. In addition, the growing awareness and acceptance of advanced security solutions across the countries in the MEA have increased the adoption of USB cameras, which provides real-time security to the owners. Moreover, growing population and subsequent rise in demand for houses and increasing spending power of consumers are bolstering the need for smart home solutions such as s USB cameras. Various real estate developers in the region are working on the construction of new residential communities. For example, in March 2022, Bloom Holding, an Abu Dhabi-based real estate developer, launched Bloom Living, a gated community, in the UAE. The community will have more than 4,000 Spanish-style villas, apartments, and townhouses surrounding a large lake. The first phase of this development is expected to be completed by October 2023. Thus, rising demand for security solutions and growing construction of residential communities in the region are expected to fuel the growth of the USB camera controller market during the forecast period.

Middle East & Africa USB Camera Controller Market Revenue and Forecast to 2030 (US\$ Million)

Middle East & Africa USB Camera Controller Market Segmentation

The Middle East & Africa USB camera controller market is segmented into type, device type, connectivity, application, and country.

Based on type, the Middle East & Africa USB camera controller market is segmented into USB 2.0 and USB 3.0. The USB 2.0 segment held a larger Middle East & Africa USB camera controller market share in 2023.

Based on device type, the Middle East & Africa USB camera controller market is segmented into joystick and remote. The joystick segment held a larger Middle East & Africa USB camera controller market share in 2023.

Based on connectivity, the Middle East & Africa USB camera controller market is segmented into wired and wireless. The wired segment held a larger Middle East & Africa USB camera controller market share in 2023.

Based on application, the Middle East & Africa USB camera controller market is segmented into residential and non-residential. The non-residential segment held a larger Middle East & Africa USB camera controller market share in 2023.

Based on country, the Middle East & Africa USB camera controller market has been categorized into Saudi Arabia, South Africa, the UAE, and the Rest of Middle East & Africa. The UAE dominated the Middle East & Africa USB camera controller market in 2023.

Infineon Technologies AG, Shenzhen Minrray Industry Co Ltd, Sony Group Corp, and SZ Tenveo are some of the leading companies operating in the USB camera controller market in the region.
