## **Abstracts**

The Middle East & Africa Welded Steel Tubes Market is projected to grow significantly, reaching an estimated US\$ 15,632.3 million by 2031, up from US\$ 12,412.7 million in 2024. This growth reflects a compound annual growth rate (CAGR) of 3.6% from 2025 to 2031, driven primarily by the increasing demand from the oil and gas sector.

## **Executive Summary**

The welded steel tubes market in the Middle East & Africa is experiencing a steady upward trajectory, largely fueled by the burgeoning needs of the oil and gas industry. Welded steel tubes are essential for constructing pipelines that transport oil and gas, and the surge in infrastructure projects has significantly boosted their demand. The region has emerged as a global hub for energy, with over 610 oil and gas projects attracting investments exceeding US\$ 406 billion. This influx of capital underscores the growing necessity for pipeline construction and related steel products.

Moreover, both government and private sector investments are focused on enhancing

energy infrastructure to meet the rising demand for electricity in industrial and residential sectors. According to the International Energy Agency, energy sector investments in the Middle East are projected to reach nearly US\$ 175 billion in 2024. These initiatives are expected to create substantial opportunities for manufacturers and suppliers of welded steel tubes, thereby supporting market growth in the region.

## Market Segmentation Analysis

The Middle East & Africa Welded Steel Tubes Market can be segmented based on various criteria:

**By Steel Grades:** The market is divided into Carbon Base Grades, Boron Grades, Alloy Grades, HSLA, AHSS, and Others. In 2024, Carbon Base Grades dominated the market share.

**By Application:** Applications include Exhaust, Automotive, Appliances, Medical Devices, HVAC, Burner, Conveyor Belts, and Others, with Automotive holding the largest share in 2024.

**By Type:** The market is categorized into ERW (Electric Resistance Welded), LSAW (Longitudinal Submerged Arc Welded), and SSAW (Spiral Submerged Arc Welded), where ERW accounted for the largest market share in 2024.

**By Coating Type:** The market is segmented into Clear Coat and Non-Coated, with Non-Coated tubes leading in market share in 2024.

## Market Outlook

The construction industry is witnessing rapid growth across various countries, driven by increased government investments and a rising demand for infrastructure projects. In the Middle East & Africa, infrastructure investment is accelerating as governments aim to diversify their economies, improve connectivity, and support energy transitions. For instance, Abu Dhabi plans to sign US\$ 12.8 billion in new private-sector infrastructure contracts in the latter half of 2025, focusing on housing, schools, roads, and social infrastructure. Additionally, the Islamic Development Bank and the Asian Infrastructure Investment Bank have committed around US\$ 6.15 billion to the 'Mission 300' initiative in Africa, which aims to provide electricity access to 300 million people.

These developments indicate a shift in the region from oil-dependent infrastructure to integrated transport, renewable energy, and digital connectivity systems, presenting significant opportunities for technology, engineering, procurement, and financing firms.

Welded steel tubes are crucial in commercial and industrial construction, serving as columns and beams. Their high tensile strength allows them to withstand both compression and tension, making them ideal for load-bearing applications. Consequently, the global rise in construction investments is a key driver for the welded steel tubes market.

### **Country Insights**

The market is further segmented by country, including South Africa, Saudi Arabia, the United Arab Emirates, and the Rest of Middle East & Africa, with the Rest of Middle East & Africa holding the largest share in 2024.

In Saudi Arabia, the welded steel tube market is on a consistent rise, primarily due to significant infrastructure investments and the growth of the oil and gas sector. The Vision 2030 program aims to diversify the economy, leading to numerous projects that require steel tubes for pipelines, construction, and utilities. The country has committed approximately US\$ 1 trillion to pipeline infrastructure projects to enhance oil and gas distribution networks and promote sustainable industrial growth. Major projects like Neom, a futuristic city with a projected cost of US\$ 500 billion, and Red Sea Global, a luxury tourism initiative worth US\$ 23.6 billion, are already driving demand for welded steel tubes across various sectors.

### **Competitive Landscape**

Key players in the Welded Steel Tubes Market include Tenaris SA, Vallourec SA, Tata Steel Ltd, JSW Steel Ltd, Nippon Steel Corp, ArcelorMittal, Markin Tubing, Pennsylvania Steel Company, Inc., Hofmann Industries, Inc., and AMETEK Inc. These companies are employing strategies such as expansion, product innovation, and mergers and acquisitions to enhance their market presence and offer innovative products to consumers.
