Flourishing Pharmaceutical Industry and Increasing R&D Activities in Pharmaceutical Industry Fuels North America Clinical Trials Market

The pharmaceutical industry is one of the most R&D-intensive industries globally. The value of medicines is becoming increasingly important as pharmaceutical companies are keen to ensure that R&D achieves their intended goal. Over the last decade, the number of new drugs approved yearly has also increased. Efforts are being made to achieve greater effectiveness and efficiency in fulfilling patients' needs. The US is a leading country in R&D investments, producing over half of the world's new molecules in the past decade. The US accounted for 62.3% of sales of new medicines launched during 2014–2019. R&D is a significant and essential part of the business of pharmaceutical companies as it enables them to come up with new molecules for various therapeutic applications with significant medical and commercial potential.

R&D expenditure is done to discover, examine, and produce new products; upfront

payments; improve existing outcomes; and demonstrate product efficacy and regulatory compliance before launch. The R&D investments differ as per the need and demand for clinical trials. The cost includes materials, supplies used, and salaries, along with the cost of developing quality control.

North America Clinical Trials Market Overview

The North America clinical trials market is segmented into the US, Canada, and Mexico. The US is the largest and fastest-growing market for clinical trials. The market growth in the region is accredited to the US emerging as a leading clinical research destination and the innovative services offered by companies for applications in clinical trials.

The US has emerged as a leading clinical research destination. Nearly half of the total clinical trials are conducted in the US. Additionally, most pharma research companies prefer to perform clinical trials in the US owing to established medical infrastructure, fast approval timelines, a favorable regulatory framework, and accepted clinical trial generated data globally. A World Health Organization (WHO) report states that the US registered the highest number of clinical trials (157,618) in 2021.
