Abstracts

The North America commercial wooden interior door applications market is projected to reach US\$ 1,840.40 million by 2028, growing at a CAGR of 4.7% from 2023 to 2028.

An upsurge in construction work across commercial spaces and several industries owing to growing urbanization is driving the demand for interior doors. Government bodies are putting additional emphasis on strengthening developments in construction and infrastructural activities, which is further triggering the demand for wooden interior doors. East River Mixed-Use Development in Houston, Texas, US, is a project that involves the construction of commercial, retail, and residential spaces across 150 acres. The phase I of the project, spread over 26 acres, is due for completion in 2023 and is expected to have 300,000 sq. ft. of office space and 100,000 sq. ft. of retail space. The under-construction Madison Yards project is a mixed-use community on ~21 acres of land in Madison, Wisconsin, US. The site is expected to have a hotel, medical/office space (400,000 sq. ft.), Whole Foods Market (50,000 sq. ft.), retail space, restaurants, and entertainment centers. Thus, the rising number of commercial construction projects triggers the adoption of wooden doors in North America, thereby fueling the North America commercial wooden interior door applications market growth.

Per the Global Construction 2030, it is estimated that the volume of construction output would increase by 85% to reach US\$ 15.5 trillion by 2030 worldwide. North America is expected to account for a large share of this growth. Investments to renovate old buildings and structures, and increasing inclination toward a greener future are boosting the scope of green buildings, which is further nurturing the construction sector. These factors are cumulatively expected to provide growth opportunities for the North America commercial wooden interior door applications market players.

The North America commercial wooden interior door applications market is segmented on the basis of material, type, mechanism, end use, and country. Based on material, the market is segmented into wood, plywood & blockboard, and MDF & others. In terms of type, the North America commercial wooden interior door applications market is segmented into panel door, bypass door, bifold door, pocket door, and others. The North America commercial wooden interior door applications market, by mechanism, is segmented into swinging, sliding, folding, and others. Based on end use, the North America commercial wooden interior door applications market is segmented into academic institutions, HoReCa (i.e., hotels, restaurants, and cafes), and others. Based on country, the North America commercial wooden interior door applications market is segmented into the US, Canada, and Mexico.

British Columbia Door Co Ltd, Concept SGA Inc, Every Energy Inc, Jeld-Wen Holding Inc, Marvin Lumber and Cedar Co, Masonite International Corp, Nicks Building Supply Inc, Simpson Door Co, Upstate Door Inc, and Woodgrain Inc are among the key commercial wooden interior door applications market players operating in North America.
