## **Abstracts**

The North America educational furniture market was valued at US\$ 3,493.99 million in 2022 and is expected to reach US\$ 5,205.50 million by 2030; it is estimated to grow at a CAGR of 5.1% from 2022 to 2030.

**Increase in Demand for Educational Furniture in Newly Constructed Schools Fuels North America Educational Furniture Market**

The demand for educational furniture is increasing with schools adapting to the changing needs of students. An upsurge in student population due to increased education awareness in urban and rural areas has led to the construction of more schools and increased student enrollment around the world. Further, mandatory primary education systems by national governments promote school construction. With the aging school facilities, a surge in the number of students, and changes in building construction and safety codes, the government authorities of many countries are either investing in new infrastructure or upgrading existing ones. Thus, the growing construction of schools is driving the growth of the North America educational furniture market.

**North America Educational Furniture Market Overview**

Furniture manufacturers in North America continuously enhance their overall business operations to meet distinct customer demands. Most domestic and international companies have a strong foothold in North America. The educational furniture market in

North America is segmented into the US, Canada, and Mexico. The US is a major contributor to the regional market, followed by Canada and Mexico, respectively. Educational institutions in North America are upgrading their existing resources and procuring innovative furniture. Effective manufacturing and trade policies are also contributing to the growth of the educational furniture market. In addition, ergonomically designed school furniture to prevent health issues in children, especially arising from incorrect posture, is gaining significant traction in this region.

The demand for portable and adjustable furniture with easy reconfiguration can be attributed to comprehensive, interactive, and dynamic teaching styles adopted in the form of blended learning and flipped classrooms. With the progress of the education sector, North America is transitioning from traditional school furniture to innovative and aesthetically appealing furniture. Educational furniture is manufactured in distinct designs, shapes, and colors from different materials, such as wood, plastic, or metal. The US marks the presence of major educational furniture manufacturers, namely Fleetwood Furniture, Herman Miller Inc, and Steelcase Inc. Further, Semplova, Educan School Furniture Ltd, RJH Solutions, and CDI Spaces are among the educational furniture manufacturers and suppliers operating in Canada, among others. According to the 2021 Infrastructure Report Card published by the American Society of Civil Engineers, there are ~84,000 public schools with ~100,000 buildings in the US, with an estimated enrollment of 56.8 million by 2026.

Thus, an increase in the number of schools, an inclination towards modern and ergonomic furniture, and the presence of educational furniture manufacturers are expected to boost the educational furniture market in North America in the coming years.
