## **Abstracts**

The North America emergency department information system (EDIS) market is projected to grow from US\$ 337.79 million in 2022 to US\$ 711.19 million by 2028. It is estimated to record a CAGR of 13.2% from 2022 to 2028.

High Adoption of Emergency Department Information Systems Fuels North America Emergency Department Information System (EDIS) Market

Emergency department information systems (EDIS) improve healthcare staff and resource utilization, which helps manage patient flow. The systems also help enhance hospitals' decision-making by providing comprehensive real-time data for hospital administrations. The EDIS solutions reduce the cost of healthcare facilities by lowering labor costs. North America dominates the global emergency department information system market. The demand for emergency department information systems is high in the region due to the wide acceptance of modern technologies in countries such as the US and Canada. Several countries across the region are known for the significantly rising adoption of telematics solutions, facilitating digital transformation in healthcare settings. They are also recognized for growing expenditures in healthcare infrastructure and the availability of technologically advanced equipment in healthcare facilities. In

In addition, the rapidly increasing adoption of hospital IT for gaining greater efficiency in administrative processes is propelling the North America emergency department information system (EDIS) market growth.

## North America Emergency Department Information System (EDIS) Market Overview

The North America emergency department information system (EDIS) market is analyzed based on three major countries: the US, Canada, and Mexico. North America held a prominent position in the global market due to an increase in patient flow at the emergency departments, a rise in the prevalence of chronic and life-threatening disorders, and a growing need for efficient emergency department management systems. Furthermore, a surge in the geriatric population and the presence of a large number of market players would contribute to the market growth during the forecast period.
