Abstracts

The North America Helicopter Hoist Winches and Hooks Market is projected to grow significantly, reaching an estimated US\$ 647.0 million by 2031, up from US\$ 434.1 million in 2024, reflecting a compound annual growth rate (CAGR) of 6.0% from 2025 to 2031. This growth is largely driven by strategic initiatives in the offshore wind energy and telecommunications sectors, which are increasingly relying on helicopter hoists, winches, and hooks for efficient material handling and transportation.

In December 2024, Invenergy's response to the Bureau of Ocean Energy Management's (BOEM) Request for Competitive Interest (RFCI) for two Wind Energy

Areas (WEAs) in the Gulf of Mexico highlights the growing interest in offshore projects. Such projects necessitate the use of helicopter hoists and winches for the safe and timely transportation of heavy equipment, particularly in challenging offshore environments. Additionally, Windar Renovables completed the fabrication of the first of 90 offshore towers for the Coastal Virginia Offshore Wind (CVOW) project, which will support 176 wind turbines. This scale of operation underscores the complexity and demand for reliable hoisting solutions in the offshore wind sector.

The telecommunications industry also contributes to the demand for helicopter hoists, winches, and hooks. For instance, Rogers Communications Inc. secured a US\$ 4.86 billion equity investment from Blackstone and Canadian institutional investors in April 2025, indicating a robust economic environment conducive to infrastructure projects. This investment is expected to enhance telecommunications installations, further increasing the need for hoisting activities.

Market segmentation reveals that the North America Helicopter Hoist Winches and Hooks Market is categorized by product type, load capacity, and application. By product type, the market includes Cargo Hooks, Double Hooks, Specialized Hooks, and Hoists and Winches, with the Hoists and Winches segment leading in 2024. In terms of cargo hooks, the Standard Cargo Hook segment was the largest, while the Quick Release Hooks segment dominated the specialized hooks category. The market is also segmented by load capacity, with the Below 1500 lbs category holding the largest share, and by application, where Military Operations emerged as the leading segment. The market is witnessing a heightened focus on safety and compliance, driven by stringent safety regulations. Manufacturers are investing in research and development to enhance safety features in their products. For example, Vita Inclinata Technologies announced the completion of Army Airworthiness qualification for its Vita Rescue System (VRS), which is set to improve search-and-rescue operations. Similarly, Onboard Systems International, LLC received FAA certification for its TALON HEC dual cargo hook systems, which comply with safety regulations and can be integrated into existing helicopter configurations. This trend towards safety and compliance is expected to shape the market significantly in the coming years.

Geographically, the market is segmented into the United States, Canada, and Mexico, with the United States holding the largest market share in 2024. The growth in the US market can be attributed to a surge in infrastructure development projects. The Infrastructure Investment and Jobs Act (IIJA), approved in February 2023, allocated US\$ 1.25 trillion for infrastructure improvements, including US\$ 550 billion for upgrading roads, bridges, airports, and railways. This investment is expected to create a substantial demand for helicopter hoists, winches, and hooks as construction activities ramp up. Additionally, the US Federal Aviation Administration's funding of US\$ 1 billion for airport infrastructure improvements further supports the need for reliable hoisting

equipment.

Key players in the North America Helicopter Hoist Winches and Hooks Market include Airbus SE, Moog, Inc., Life Support International, Inc., Breeze-Eastern, LLC, Dart Aerospace, VINCORION Advanced Systems GmbH, Sika Interplant Systems Limited, Heli-One, Onboard Systems Hoist & Winch, AllClear Aerospace & Defense, and Helitech Solutions. These companies are pursuing various strategies such as product innovation, expansion, and mergers and acquisitions to enhance their market presence and offer advanced solutions to their customers.

In summary, the North America Helicopter Hoist Winches and Hooks Market is poised for significant growth driven by infrastructure investments, advancements in safety features, and increasing demand from the offshore wind and telecommunications sectors. As the market evolves, companies that prioritize innovation and compliance with safety standards will likely lead the way.
