## **Abstracts**

The North America non-invasive ventilation masks market was valued at US\$ 902.92 million in 2023 and is expected to reach US\$ 1,412.14 million by 2031; it is estimated to register a CAGR of 5.7% from 2023 to 2031.

### **Increasing Prevalence of Respiratory Diseases Fuels North America Cosmetic Preservatives Market**

The prevalence of respiratory illnesses such as asthma, obstructive sleep apnea (OSA), and chronic obstructive pulmonary disease (COPD) is rising worldwide. Invasive ventilation methods are often avoided in COPD patients to reduce risks of complications such as infections and mechanical lung injuries. Noninvasive ventilation (NIV) masks are preferred because they provide breathing support without requiring intubation. Thus, the chronic, long-term nature of COPD and sleep apnea leads to repeat purchases and creates a demand for NIV masks, thereby generating a steady, sustainable market for manufacturers.

### **North America Cosmetic Preservatives Market Overview**

The North America non-invasive ventilation masks market is segmented into the US,

Canada, and Mexico. The US holds the largest size of the North America non-invasive ventilation masks market. The growing geriatric population base suffering from respiratory diseases such as COPD is the primary driver of the regional market. For instance, according to the United Nations Department of Economic and Social Affairs (UNDESA), the population aged above 60 is expected to reach 2 billion by 2050, with a growth rate of ~3% annually. Furthermore, the increasing acceptance of novel and innovative products and the availability of R&D grants are contributing to the growth of the North America non-invasive ventilation masks market in North America.

## North America Cosmetic Preservatives Market Revenue and Forecast to 2031 (US\$ Million)

### North America Cosmetic Preservatives Market Segmentation

The North America non-invasive ventilation masks market is categorized into product, application, end user, and country.

By product, the North America non-invasive ventilation masks market is bifurcated into noninvasive ventilation disposable mask and noninvasive ventilation reusable mask. The noninvasive ventilation disposable mask segment held a larger share of the North America non-invasive ventilation masks market share in 2023.

In terms of application, the North America non-invasive ventilation masks market is segmented into sleep apnea, chronic obstructive pulmonary disease, pneumonia, and others. The sleep apnea segment held the largest share of the North America non-invasive ventilation masks market share in 2023.

Based on end user, the North America non-invasive ventilation masks market is segmented into hospitals and clinics, home care, and others. The hospitals and clinics segment held the largest share of the North America non-invasive ventilation masks market share in 2023.

Based on country, the North America non-invasive ventilation masks market is segmented into the US, Canada, and Mexico. The US segment held the largest share of North America non-invasive ventilation masks market in 2023.
