Abstracts

The North America radar detectors market was valued at US\$ 114.06 million in 2022 and is expected to reach US\$ 155.26 million by 2030; it is estimated to grow at a CAGR of 3.9% from 2022 to 2030 .

Increasing Number of Speed Traps Fuel the North America Radar Detectors Market

Speed traps are sections of roads where law enforcement officers use radar or laser to target motorists exceeding the speed limit. They are often set up in areas where there is a high rate of accidents or where there is a need to reduce traffic speed. Motorists' use of radar detectors has increased in recent years in response to the increasing use of speed traps. Radar detectors can detect the radar signals emitted by speed traps, giving motorists time to slow down and avoid getting fined.

Various governments worldwide are installing speed traps to reduce road accidents and improve safety. For instance, in June 2023, the Provincial Government, the City of Mount Pearl, and the Town of Paradise partnered to launch a traffic camera pilot project to detect and capture images of speeding motorists. Thus, various law enforcement authorities have increased the number of speed traps, which is driving the demand for radar detectors.

North America Radar Detectors Market Overview

The North American radar detector market is segmented into the US, Canada, and

Mexico. The US holds the largest share of the North American radar detector market. The market in North America is expected to grow owing to the factors such as presence of several competitors, rising product approvals, growing automotive industry, increasing number of industrial procedures, and a well-established industrial infrastructure. The regional market is also predicted to expand to prevent license suspension and penalties due to over speeding. Law enforcement agencies in North America use three radar frequencies. The K band runs between 24.05 and 24.25 GHz, the X band between 10.5 and 10.55 GHz, and the Ka band between 33.4 and 36 GHz.

North America Radar Detectors Market Segmentation

The North America radar detectors market is segmented based on type, radar type, and country.

Based on type, the North America radar detectors market is bifurcated into corded and remote mounted. The corded segment held a larger market share in 2022.

Based on radar type, the North America radar detectors market is bifurcated into dash camera based and without dash cam. The without dash cam segment held a larger market share in 2022.

Based on country, the North America radar detectors market is segmented into the US, Canada, and Mexico. The US dominated the North America radar detectors market share in 2022.

Uniden America Corporation; K40 Electronics, LLC.; Adaptiv Technologies; Valentine Research, Inc.; Radar Solution Inc.; Whistler Group Inc.; Radenso; and Cedar Electronics Corps are some of the leading players operating in the North America radar detectors market.
