Abstracts

The North America rain gutter market was valued at US\$ 3,408.94 million in 2023 and is expected to reach US\$ 4,733.59 million by 2031; it is estimated to register a CAGR of 4.2% from 2023 to 2031.

Increasing Demand for Rainwater Harvesting Fuels North America Rain Gutter Market

Rainwater harvesting is widely adopted globally as it allows the collection of large amounts of water and mitigates the current water scarcity problems in various countries. Rainwater harvesting is adopted by most of the residential and commercial construction companies and contractors in order to solve the water scarcity problems. Most rooftops have the necessary platforms and rain gutter systems for collecting rainwater.

Rainwater is freely available and can be utilized for various household purposes. The annual investment in rainwater harvesting is increasing rapidly due to a surge in demand for water conservation and an increase in government support and initiatives.

Several companies are developing rainwater harvesting projects to meet the water demand. For instance, in February 2023, Optima Inc., the real estate development company, developed the largest private rainwater harvesting system in the US. Optima planned to build a project worth US\$ 1 billion with sustainable residential areas and the largest private rainwater harvesting system. This project requires rain gutters to supply and save the water into storage tanks. Hence, the rise in investment in rainwater harvesting projects worldwide, combined with a surge in government support and initiatives, drives the market.

North America Rain Gutter Market Overview

The US, Canada, and Mexico are the major nations contributing to the growth of the rain gutter market in North America. Mounting construction activities and the scaling demand for rainwater harvesting technologies in residential and commercial buildings across the region boost the market growth substantially. In addition, the growing popularity of eco-friendly construction techniques is expected to support the rain gutter market growth in North America during the forecast period. An increase in government initiatives to build the smart industrial sector is expected to fuel the demand for rain gutters in this region in the coming years. Moreover, favorable government schemes have positively impacted the US rainwater harvesting projects. According to McGraw Hill Construction and the Canada Green Construction Council, the eco-friendly building market in Canada is gradually rising. As a result, the demand for rain gutters to boost rainwater harvesting in construction projects has increased.

Cornerstone Building Brands, Englert Inc., Alside, and OmniMax International, LLC are contributing to the expansion of the North American rain gutter market. Mergers and acquisitions are among the chosen business strategies for key industry players looking to extend their geographic presence and complete product ranges. The growing realization of rainwater harvesting potential for landscape irrigation is one of the prime drivers for the rain gutter market across North America.

Some of the US states, such as Colorado, Arkansas, Kansas, Oregon, Utah, and Washington, may require a permit before implementing rainwater harvesting. However, the majority of states have no restrictions, while a few states provide additional support for harvesting rainwater by offering incentives. For instance, the City of Healdsburg offers rebates of up to US\$ 500 for rain barrels and cisterns at a rate of US\$ 0.50 per gallon.

North America Rain Gutter Market Revenue and Forecast to 2031 (US\$ Million)

North America Rain Gutter Market Segmentation

The North America rain gutter market is categorized into material type, application, and country.

Based on material type, the North America rain gutter market is segmented into aluminum, steel, vinyl, and others. the aluminum segment held the largest market share

in 2023.

In terms of application, the North America rain gutter market is segmented into residential, commercial, and industrial. The residential segment held the largest market share in 2023.

By country, the North America rain gutter market is segmented into the US, Canada, and Mexico. The US dominated the North America rain gutter market share in 2023.

Cornerstone Building Brands Inc; RHEINZINK; ENGLERT INC.; OmniMax International, LLC; Gibraltar Building Accessories Division; Spectra Gutter Systems; and Alside are some of the leading companies operating in the North America rain gutter market.

Reason to buy

Save and reduce time carrying out entry-level research by identifying the growth, size, leading players, and segments in the North America rain gutter market.

Highlights key business priorities in order to assist companies to realign their business strategies.

The key findings and recommendations highlight crucial progressive industry trends in the North America rain gutter market, thereby allowing players across the value chain to develop effective long-term strategies.

Develop/modify business expansion plans by using substantial growth offering developed and emerging markets.

Scrutinize in-depth North America market trends and outlook coupled with the factors driving the North America rain gutter market, as well as those hindering it.

Enhance the decision-making process by understanding the strategies that underpin commercial interest with respect to client products, segmentation, pricing, and distribution.
