Abstracts

The South America passport reader market is expected to grow from US\$ 19.72 million in 2022 to US\$ 24.12 million by 2028; it is estimated to grow at a CAGR of 3.4% from 2022 to 2028 .

Use of Mobile Passport Scanners

Border control requirements are exceptionally diverse, with certain borders fixed in airports or posts on roads, and several border control measures take place in a mobile manner on ships, trains or by monitoring pedestrians. It outstretched the requisite for an integrated portable reader capable of completing all measures of immigration procedures, such as reading varied ID documents, obtaining biometrics, and connecting to remote databases.

Additionally, passport checks are an essential security measure for several businesses and institutions. In some instances, a passport is the most appropriate document to collect necessary customer information. Also, in some cases, passports are mandatory by law, and the collected data must be shared with local authorities. As manual checking of passports is a tedious task in some businesses, they prefer using dedicated passport readers. In such cases, mobile passport scanning integrated with Mobile

optical character recognition (OCR) is an ideal alternative. Thus, use of mobile passport scanners is emerging as a trend for the passport reader market growth.

Market Overview

The aviation sector in Latin America is witnessing a constant growth in terms of passenger volume, which increased to 28.7 million passengers until July 2019, 4.5% up from 2018. It is projected that the airport sector in the Latin American region should invest ~US\$ 55 billion by 2040. These investments will emphasize on airport infrastructure, including the expansion, renovation, and modernization of existing facilities, as well as the construction of new airports. Also, Colombia is ranked 4th in the world in terms of forecast of the air sector growth over the next 20 years. The country's airport sector is projected to contribute significantly to the connectivity improvement. As per a CEPAL's report, the Latin American region requires a total investment of US\$ 25.5 billion during 2016–2025 to fill the capacity gap in airport infrastructure. To meet this challenge, governments, as well as air infrastructure concessionaires, are focusing on making significant airport investments. However, the lack of investments in airport infrastructure is restricting the growth of the market across South America.
