Abstracts

The South & Central America dental milling machines market is expected to grow from US\$ 156.24 million in 2022 to US\$ 244.71 million by 2028; it is estimated to grow at a CAGR of 7.8% from 2022 to 2028.

Rising Burden of Dental Diseases and Increasing Geriatric Population Drive South & Central America Dental Milling Machines Market

Oral diseases, including dental diseases, are highly preventable. However, these diseases can be a major health burden for many countries and affect people throughout their lifetime. A few common dental problems include dental caries (tooth decay), periodontal diseases, and tooth loss. Thus, the increasing geriatric population and rising burden of dental diseases are boosting the demand for teeth replacement and other restoration procedures, which is fueling the South & Central America dental milling market growth.

South & Central America Dental Milling Machines Market Overview

The South & Central America dental milling machines market is segmented into Argentina, Brazil, and the Rest of South & Central America. The market for dental milling machines in the region is expected to grow due to the growing dental sector and increasing medical tourism in Argentina and Brazil. Furthermore, the government support for dental care and initiatives for the promotion of good oral health through generating awareness campaigns are also expected to foster the growth of the region.

Moreover, in 2004, the Brazilian National Health Service, Sistema ?nico de Sa?de (SUS), launched the National Oral Health Policy “Pol?tica Nacional de Sa?de Bucal (PNSB)” to expand dental care at primary healthcare. In 2006, specialized dental centers (CEOs) were implemented, providing endodontics, periodontics, surgery/stomatology, and treatment for patients with special needs. Since the implementation of this policy, an expansion in the number of oral health teams in primary care was observed, resulting in population coverage of 41.2%. Regarding the expansion of secondary care, 1,134 Centers of Specialized Dentistry were established between 2004 and 2019, significantly increasing the availability of oral health services for the population of Brazil.

South & Central America Dental Milling Machines Market Revenue and Forecast to 2028 (US\$ Million)

South & Central America Dental Milling Machines Market Segmentation

The South & Central America dental milling machines market is segmented into product type, technology, application, end user, and country.

Based on product, the South & Central America dental milling machines market is segmented into in-lab milling machines and in-office milling machines . The in-lab milling machines segment held the larger market share in 2022.

Based on technology, the South & Central America dental milling machines market is segmented into CAD or CAM milling and copying milling machines . The CAD or CAM milling segment held the larger market share in 2022.

Based on application, the South & Central America dental milling machines market is segmented into bridges , crowns, dentures, veneers, and inlays or onlays . The bridges segment held the largest market share in 2022.

Based on end user, the South & Central America dental milling machines market is

segmented into dental laboratory, dental clinic, and research and academic institutes . The dental laboratory segment held the largest market share in 2022.

Based on country, the South & Central America dental milling machines market is segmented into Brazil, Argentina, and the Rest of South & Central America. Brazil dominated the market share in 2022.

3M Co, Amann Girrbach AG, Dentsply Sirona Inc, and Ivoclar Vivadent Inc are the leading companies operating in the South & Central America dental milling machines market.
