## **Abstracts**

The South and Central America gear pump market is projected to grow significantly, with an expected market size of approximately US\$ 377.32 million by 2031, up from US\$ 315.72 million in 2024. This growth translates to a compound annual growth rate (CAGR) of 2.8% from 2025 to 2031.

## **Executive Summary and Market Analysis**

The gear pump market in South and Central America is primarily segmented into Brazil, Argentina, and the Rest of South and Central America. The automotive sector in this region is anticipated to experience substantial growth in the near future. According to the Associacao Nacional dos Fabricantes de Veiculos Automores (ANFAVEA), Brazilian vehicle production (excluding Completely Knocked Down (CKD) units) reached 175,541 units in January 2025, marking a 15.1% increase compared to January 2024. Additionally, vehicle exports surged to 28,688 units in January 2025, reflecting a remarkable 52.3% rise from the previous year.

Colombia, recognized as the third-largest automobile assembler in South America after Brazil and Argentina, boasts eight vehicle assembly plants. The three major plants—Sofasa, CCA, and Mazda—account for 99% of the country's production output and 32% of sales. In Argentina, motor vehicle production was reported at 610,725 units in December 2023, up from 536,893 units in December 2022, indicating a robust growth trajectory.

Global automotive manufacturers are increasingly investing in the region. For instance, Stellantis announced a US\$ 385 million investment in its Cordoba factory in Argentina, part of a larger Euro 5.6 billion investment plan for South America aimed at developing new vehicle lines and engines. This burgeoning automotive industry is expected to drive demand for gear pumps in South and Central America in the coming years.

## **Strategic Insights**

### **Market Segmentation Analysis**

The gear pump market is categorized based on type, pressure, and industry:

**By Type:** The market is divided into external gear pumps and internal gear pumps, with external gear pumps holding a larger market share in 2024.

**By Pressure:** The segments include pumps rated up to 100 bar, 100 to 300 bar, and above 300 bar, with the 100 to 300 bar segment dominating the market in 2024.

**By Industry:** The market is segmented into various industries, including food and beverages, industrial and material handling machines, chemical and petrochemical, oil and gas, automotive, water treatment, aerospace, and others. The industrial and material handling machines segment accounted for the largest share in 2024.

## **Market Outlook**

To meet the increasing demand for gear pumps across various sectors such as oil and gas, water and wastewater management, and chemicals, market players are expanding their manufacturing and distribution capabilities. Notable mergers and acquisitions in the industry include:

Ingersoll Rand Inc. acquired ILC Dover in June 2024, enhancing its portfolio of high-margin pumping solutions for various industries, including life sciences and wastewater treatment.

Atlas Copco Group announced the acquisition of KRACHT GmbH in January 2024, which specializes in external gear pumps and fluid measurement technologies, further strengthening its industrial pump segment.

Dover acquired Witte Pumps & Technology GmbH in December 2022, aiming to expand its product offerings and geographic reach within the gear pump market.

These strategic moves are expected to bolster the growth of the gear pump market during the forecast period.

## Country Insights

The South and Central America gear pump market is primarily driven by Brazil, which held the largest market share in 2024. The Brazilian government has prioritized enhancing its wastewater treatment infrastructure, as outlined in the Basic Sanitation Legal Framework published in 2020, which aims to provide universal access to water and sewage services by 2033. This initiative is expected to significantly increase the demand for water and wastewater treatment technologies, including gear pumps.

Moreover, companies in Brazil are actively involved in constructing wastewater treatment facilities. For example, Veolia announced in September 2024 that it would deliver advanced water treatment facilities for Suzano's new plant in Mato Grosso do Sul, further indicating the growing focus on water management in the country.

## Company Profiles

Key players in the South and Central America gear pump market include Bosch Rexroth AG, Danfoss AS, Bucher Hydraulics GmbH, Parker Hannifin Corp, Kawasaki Heavy Industries Ltd, CASAPPA S.p.A, Bailey International LLC, HYDAC International GmbH, Eaton Corp Plc, Marzocchi Pompe S.p.A, KYB Corporation, Viking Pump, Inc., and Gorman-Rupp Pumps, among others. These companies are pursuing various strategies, including expansion, product innovation, and mergers and acquisitions, to enhance their market presence and offer innovative gear pump solutions to their customers.
