Product Innovations and Technological Developments in Manhole Covers Fuels South & Central America Manhole Covers Market

Many companies across the region are focusing on technological developments and new products related to manhole covers. Further, in October 2019, Fiberlite developed a new range of radio frequency (RF) friendly manhole covers, which are designed to support data transfer between antennas aboveground and underground. Hence, there has been significant demand for RF-friendly manhole covers. RF smart manhole covers are used for underground monitoring systems and telematics in utilities, where transmitters under covers are used to monitor or control oil/water usage, floodwater, sewer flow, etc. Thus, all these recent technological developments and product innovations in manhole covers are likely to support the South & Central America manhole covers market growth in the coming years.
