Preference for Natural Ingredients Over Synthetic Fuels South & Central America Organic Selenium Yeast for Feed Market

Livestock farmers and pet owners seek proper nutrition for their animals to enhance their performance and productivity and fulfill their nutritional requirements. With rising awareness about clean-label animal nutrition products, livestock farmers and pet owners check the nutrients and ingredients included in supplements to ensure that the animals receive the most appropriate and beneficial nutrients. They search for products free of artificial additives, preservatives, and fillers. The increasing inclination toward healthy diet and growing awareness regarding the benefits of natural ingredients in animals have upsurged the demand for animal feed infused with natural and organic nutrients.

The livestock animals who consume organically made food offer meat that has high nutritional value. Organic milk and meat are rich in various nutrients such as enzymes, bioflavonoids, and antioxidants. Hence, health-conscious consumers prefer organic meat over conventional as it does not contain pesticides. Due to the rising demand for organic meat and dairy products, the poultry sector, livestock farms, and animal husbandry have focused on purchasing high-quality organic feed products to supply

organic meat to consumers. Thus, animal feed manufacturers are fortifying feed with organic nutrients to cater to the growing demand. Therefore, the preference for natural and organic ingredients over synthetic in animal feed is expected to create huge opportunity for market growth.

South & Central America Organic Selenium Yeast for Feed Market Overview

The organic selenium yeast for animal feed market in Brazil is growing notably due to the presence of the largest livestock and animal feed industries. According to the Alltech Global Feed Survey conducted in 2021, Brazil ranked third globally in animal feed production, producing almost 1/3 of the animal feed (77.6 million tons). To enhance the quality of feed, manufacturers fortified it with nutritional additives such as organic selenium yeast. Organic selenium yeast is used in animal and pet food products to enhance productivity and nutritional balance. These factors propel the organic selenium yeast for animal feed market growth in Brazil.
