The South & Central America sharps containers market is expected to grow from US\$ 20.75 million in 2022 to US\$ 29.22 million by 2030. It is estimated to grow at a CAGR of 4.4% from 2022 to 2030.

Increasing Government Initiatives for Safe Sharps Disposal Fuels South & Central America Sharps Containers Market

Today, safe practices related to the handling and disposal of sharp healthcare instruments are being implemented to protect staff, patients, and visitors from exposure to bloodborne infections. In addition, concerned authorities, such as National Health Service (NHS) and Food and Drug Administration (FDA), have taken sharps disposal

initiatives to reduce the risks involved. The waste is classified as biomedical waste, which includes items that can pierce the skin, such as blades, needles, syringes, lancets, knives, scissors, broken glass, and sharp plastic. The ultimate goal of sharps waste management is to carefully handle and treat sharp materials until disposal.

Government agencies make the necessary efforts to implement guidelines for the effective disposal of medical waste. The World Health Organization (WHO) and other regulatory agencies worldwide have established standard guidelines for the disposal and management of biomedical waste. All pharmaceutical companies, research institutes, hospitals, and other healthcare providers must comply with governing body guidelines. Manufacturers are also required to follow certain guidelines when manufacturing sharps containers.

Therefore, the increase in initiatives and guidelines by regulatory agencies for the safe disposal of sharps is expected to provide growth opportunities for the South & Central America sharps containers market.

South & Central America Sharps Containers Market Overview

The South & Central America sharps containers market is segmented into Argentina, Brazil, and the Rest of South & Central America. The market is expected to grow owing to the increasing ubiquity of diabetes (both type I and type II). According to the estimates of the International Diabetes Federation, the global prevalence of diabetes is expected to increase from 366 million in 2011 to 552 million by 2030, and such rapid growth in prevalence is expected to have a significant impact on the market growth over the forecast period. Additionally, the introduction of regulations in favor of insulin manufacturers in the region has encouraged various multinational companies to enter into establishing production units. Furthermore, the region is expected to experience growth opportunities due to the increasing prevalence of chronic disease in the countries, rising number of surgical procedures, and the growing medical tourism industry for surgeries are expected to boost the South & Central America sharps containers market during the forecast period.
