

GABA (CAS 56-12-2) Market Research Report 2025

<https://marketpublishers.com/r/G72123E7953EN.html>

Date: May 2025

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: G72123E7953EN

Abstracts

GABA (CAS 56-12-2) Market Research Report 2025 presents comprehensive data on GABA markets globally and regionally (Europe, Asia, North America etc.)

The report includes GABA description, covers its application areas and related patterns. It overviews GABA market, names GABA producers and indicates its suppliers.

Besides, the report provides GABA prices in regional markets.

In addition to the above the report determines GABA consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

GABA (CAS 56-12-2) Market Research Report 2025 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. GABA (CAS 56-12-2)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. GABA APPLICATIONS

- 2.1. GABA application spheres, downstream products

3. GABA MANUFACTURING METHODS

4. GABA PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. GABA MARKET WORLDWIDE

- 5.1. General GABA market situation, trends
- 5.2. Manufacturers of GABA
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. GABA suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. GABA market forecast

6. GABA MARKET PRICES

6.1. GABA prices in Europe

6.2. GABA prices in Asia

6.3. GABA prices in North America

6.4. GABA prices in other regions

7. GABA END-USE SECTOR

7.1. GABA market by application sphere

7.2. GABA downstream markets trends and prospects

*Please note that GABA (CAS 56-12-2) Market Research Report 2025 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name: GABA

Synonyms:

4-Aminobutyric acid

4-Aminobutanoic acid

4-Aminobutyric acid

Aminalon

Gammalone

Mielomade

Piperidinic acid

Gamma Aminobutyric Acid

Aminobutyric acid (gamma-)

3-Carboxypropylamine

Piperidic acid

?-Aminobutyric acid

CAS#: 56-12-2

Formula: $C_4H_9NO_2$

Molecular Weight: 103.12

Appearance: White to off-white solid.

Gamma-Amino Butyric acid (GABA), formed in brain cells from glutamate, is the main inhibitory neurotransmitter in the central nervous system (CNS) with the chemical formula $C_4H_9NO_2$. It is a white microcrystalline powder stable under normal temperatures and pressures; melting at 195 °C (dec.)(lit.) and boiling at 248 °C. The acid regulates the neuronal excitability through CNS and also controls the muscle tone.

At present, GABA is mainly used as a dietary supplement with a calming effect or, in other words, as a natural tranquilizer. The acid is also believed to increase the Human Growth Hormone and, thereby, is very popular among the body builders. At the same time, there are some medical disagreements concerning the GABA efficiency.

GABA is taken by mouth/under the tongue and works by blocking brain signals. The GABA uptake inhibitors which are active when given orally can be formulated as liquids, for example, syrups, suspensions or emulsions, tablets, capsules and lozenges. Usually, GABA is used to relieve anxiety, improve mood, reduce symptoms of premenstrual syndrome (PMS), to treat attention deficit-hyperactivity disorder (ADHD) as well as to promote lean muscle growth, burn fat, stabilize blood pressure and relieve pain.

Currently, GABA supplements are promoted as an alternative to tranquilizers, but medical opinion is that GABA doesn't pass the blood brain barrier, which prevents chemicals circulating in the blood from reaching the brain. Often it is just considered to be a benign placebo. Therefore, no sufficient evidence whether GABA is useful or not is provided so far.

GABA market is covered in the study GABA (CAS 56-12-2) Market Research Report 2025. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks GABA market situation, names manufacturers, suppliers as well as users. The report also provides current GABA prices in the market.
