

HEXANOIC ACID (CAS 142-62-1) Market Research Report 2026

<https://marketpublishers.com/r/H04A4818B13EN.html>

Date: June 2026

Pages: 50

Price: US\$ 2,200.00 (Single User License)

ID: H04A4818B13EN

Abstracts

HEXANOIC ACID (CAS 142-62-1) Market Research Report 2026 presents comprehensive data on HEXANOIC ACID markets globally and regionally (Europe, Asia, North America etc.)

The report includes HEXANOIC ACID description, covers its application areas and related patterns. It overviews HEXANOIC ACID market, names HEXANOIC ACID producers and indicates its suppliers.

Besides, the report provides HEXANOIC ACID prices in regional markets.

In addition to the above the report determines HEXANOIC ACID consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

HEXANOIC ACID (CAS 142-62-1) Market Research Report 2026 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. HEXANOIC ACID (CAS 142-62-1)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. HEXANOIC ACID APPLICATIONS

- 2.1. HEXANOIC ACID application spheres, downstream products

3. HEXANOIC ACID MANUFACTURING METHODS

4. HEXANOIC ACID PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. HEXANOIC ACID MARKET WORLDWIDE

- 5.1. General HEXANOIC ACID market situation, trends
- 5.2. Manufacturers of HEXANOIC ACID
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. HEXANOIC ACID suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. HEXANOIC ACID market forecast

6. HEXANOIC ACID MARKET PRICES

6.1. HEXANOIC ACID prices in Europe

6.2. HEXANOIC ACID prices in Asia

6.3. HEXANOIC ACID prices in North America

6.4. HEXANOIC ACID prices in other regions

7. HEXANOIC ACID END-USE SECTOR

7.1. HEXANOIC ACID market by application sphere

7.2. HEXANOIC ACID downstream markets trends and prospects

*Please note that HEXANOIC ACID (CAS 142-62-1) Market Research Report 2026 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name: HEXANOIC ACID

Synonyms:

N-caproic acid

2,5,6 DECADIENAL

Natural Hexanoic Acid

Hexanoic acid nat.

Hexanoic Acid , Natural

N-Caproic acid (Hexanoic acid)

1-Pentanecarboxylic acid

Caproic acid

Hexanoic acid

CAS#: 142-62-1

Formula: $C_6H_{12}O_2$

Molecular Weight: 116.16

Hexanoic acid (commonly known as caproic acid), a 6-carbon fatty acid, is one of a series of similar fatty acids found naturally in animal fats and oils; or made synthetically (e.g. from the oxidation of octanol). This clear to light yellow oily liquid is insoluble to slightly soluble in water, with a melting point of $-3^{\circ}C$ and a flash point between $202-203^{\circ}C$. Hexanoic acid occurs as a free acid or salt, as well as in the form of an ester. The salts and esters of this acid are known as hexanoates or caproates.

The chemical formula for hexanoic acid is written as $CH_3(CH_2)_4COOH$, and sometimes as $C_6H_{12}O_2$. Hexanoic acid, along with the other two similar acids – caprylic (C8) and capric (C10), is present in significantly higher proportions in goat milk than in cow milk and is responsible for the characteristic goat-like odor.

The primary use of hexanoic acid is in the manufacture of its esters for artificial flavors, and in the manufacture of hexyl derivatives such as hexylphenols.

Hexanoic acid derivatives are inhibitors of the dipeptidyl peptidase-IV (DPP-IV) enzyme and they are useful in the treatment or prevention of diseases in which this enzyme is involved – particularly in the treatment of type 2 diabetes and conditions associated with the same.

The demand for fatty acids, hexanoic acids in particular, is going up worldwide. The growth is driven by the increasing use of these acids as well as their derivatives as ingredients in environmentally improved versions of lubricants, paints and detergents. Ongoing consumer demand for natural ingredients in food, cosmetics and toiletries also supports gains.

N-caproic acid (hexanoic acid) market is covered in the study N-Caproic acid (Hexanoic acid) (CAS 142-62-1) Market Research Report 2012. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks n-caproic acid (hexanoic acid) market situation, names manufacturers, suppliers as well as users. The report also provides current n-caproic acid (hexanoic acid) prices in the market.
