

# Mesitylene (CAS 108-67-8) Market Research Report 2025

<https://marketpublishers.com/r/MA68FC3B10CEN.html>

Date: May 2025

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: MA68FC3B10CEN

## Abstracts

Mesitylene (CAS 108-67-8) Market Research Report 2025 presents comprehensive data on Mesitylene markets globally and regionally (Europe, Asia, North America etc.)

The report includes Mesitylene description, covers its application areas and related patterns. It overviews Mesitylene market, names Mesitylene producers and indicates its suppliers.

Besides, the report provides Mesitylene prices in regional markets.

In addition to the above the report determines Mesitylene consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Mesitylene (CAS 108-67-8) Market Research Report 2025 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

## Contents

### **1. MESITYLENE (CAS 108-67-8)**

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

### **2. MESITYLENE APPLICATIONS**

- 2.1. Mesitylene application spheres, downstream products

### **3. MESITYLENE MANUFACTURING METHODS**

### **4. MESITYLENE PATENTS**

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

### **5. MESITYLENE MARKET WORLDWIDE**

- 5.1. General Mesitylene market situation, trends
- 5.2. Manufacturers of Mesitylene
  - Europe
  - Asia
  - North America
  - Other regions
- 5.3. Mesitylene suppliers (importers, local distributors)
  - Europe
  - Asia
  - North America
  - Other regions

#### 5.4. Mesitylene market forecast

### **6. MESITYLENE MARKET PRICES**

#### 6.1. Mesitylene prices in Europe

#### 6.2. Mesitylene prices in Asia

#### 6.3. Mesitylene prices in North America

#### 6.4. Mesitylene prices in other regions

### **7. MESITYLENE END-USE SECTOR**

#### 7.1. Mesitylene market by application sphere

#### 7.2. Mesitylene downstream markets trends and prospects

\*Please note that Mesitylene (CAS 108-67-8) Market Research Report 2025 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

## About

Product Name:	Mesitylene
Synonyms:	1,3,5-Trimethylbenzene
CAS#:	108-67-8
Formula:	C <sub>9</sub> H <sub>12</sub>
Molecular Weight:	120.19
Appearance:	Clear, colorless liquid with distinctive aromatic odor.
Usage:	Dyestuff intermediate, solvent, paintermediate thinner.

Mesitylene (Trimethylbenzol, sym-Trimethylbenzene, Fleet-X, 1,3,5-Trimethylbenzene, 3,5-Dimethyltoluene, s-Trimethylbenzene, Benzene, 1,3,5-trimethyl-, Trimethylbenzene) refers to a derivative of benzene. Mesitylene exists as a clear, colorless liquid with a peculiar, distinctive, aromatic scent. The molecular formula of the product is C<sub>9</sub>H<sub>12</sub>, its molecular weight is 120.19. Mesitylene is miscible with alcohol, ether and benzene and miscible in ethanol, ethyl ether, acetone. The product is processed by equilibration of xylene over solid acid catalyst and by distillation of acetone with sulfuric acid catalyst.

Mesitylene is highly flammable, toxic, and hazardous for the environment. Mild irritation of eyes and skin, redness of eyes and tearing, nausea, vomiting, CNS depression, headache, dizziness, confusion, coughing, choking, drowsiness are amid potential health effects of mesitylene. The product can also cause lung damage, pulmonary edema. Repeated exposure may entail bronchitis, disturbances of blood clotting, excessive fatigue, reduced memory.

Mesitylene is used as an intermediate in the production of lacquers, paints, and varnishes, and as a solvent to process resins, gums and nitrocellulose. Besides, the product is utilized in the manufacture of trimesic acid, antioxygen, epoxy firming agent, polyester resin stabilizer, alkyd resin plasticizers and dye. Mesitylene is widely used in the electronics industry and in various industrial researches.

Mesitylene market is covered in the study Mesitylene (CAS 108-67-8) Market Research Report 2025. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks Mesitylene

market situation, names manufacturers, suppliers as well as users. The report also provides current Mesitylene prices in the market.
